Return-to-Play after Lower Limb Muscle Injury in Football Gian Nicola Bisciotti, Alessandro Corsini, Piero Volpi, 2021-10-18 Return to training RTT and return to play RTP decisions making process in football are currently based on expert's opinion. However, there are no consensus guidelines on evidence-based decision making. This book provides a framework for evidence-based decision making both in RTT and RTP following lower limb muscle injuries sustained in football. Based on the Italian Consensus Conference 2019 on return to play after lower limb muscle injury in football, it provides a list of RTT and RTP criteria after such injuries compiled by orthopedic surgeons, sports physicians, radiologists, rehabilitation physicians, sport physiologists, general surgeons, family physicians, physiotherapists, physical trainers, and psychologists working in elite football in Italy. The book identifies the main criteria for RTT and RTP following injuries involving the most important muscle groups: i.e. quadriceps, hamstring, hip adductor, hip external rotator, iliopsoas, and soleus/gastrocnemius. As such, it is a valuable reference resource for practitioners making RTT and RTP decisions making process.

The Superhuman Mind Berit Brogaard, PhD, Kristian Marlow, MA, 2015-08-25 Did you know your brain has superpowers? Berit Brogaard, PhD, and Kristian Marlow, MA, study people with astonishing talents: memory champions, human echolocators, musical virtuosos, math geniuses, and synesthetes who taste colors and hear faces. But as amazing as these abilities are, they are not mysterious. Our brains constantly process a huge amount of information below our awareness, and what these gifted individuals have in common is that through practice, injury, an innate brain disorder, or even more unusual circumstances, they have managed to gain a degree of conscious access to this potent processing power. *The Superhuman Mind* takes us inside the lives and brains of geniuses, savants, virtuosos, and a wide variety of ordinary people who have acquired truly extraordinary talents one way or another. Delving into the neurological underpinnings of these abilities, the authors even reveal how we can acquire some of them ourselves, from perfect pitch and lightning-fast math skills to supercharged creativity. *The Superhuman Mind* is a book full of the fascinating science readers look for from the likes of Oliver Sacks, combined with the exhilarating promise of *Moonwalking with Einstein*. **Kinesiology for Manual Therapies, 2nd Edition**
