Hospitality and Service Harry Katzan Jr., 2020-12-28 This book is a continuation of the study of service for beginning students of the subject and for persons that just want to know what it is It is easy reading suitable for a travel read or a beach read It could serve as a source book for a person writing a bachelor s thesis It could be useful for a manager whose service employees are not performing up to par Millions of dollars are wasted every year by businesses even though they are first rate their hospitality people act like unruly rascals How do you start a

service business I wouldn't like to start one or bring one back after the misery of the pandemic world we have experienced in the past few years. What about the next few years? Politicians are constantly under fire because they are perceived to be concerned with their own well-being instead of their constituency. What kind of service is the media providing when they produce fiction rather than fact? Look at advertising and professional sports. Do you believe any of that stuff they produce in the way of news? This book is for the youngster who asks what his mother or father does all day. Do they just push people around or do they help people achieve their true worth to the business or organization they represent? What about the car dealer that is constantly scrambling around for new business? What about some of the new stuff in business technology? Do we even know what we don't know? This book is for all of the above. I sincerely hope the book is a service to you.

Service is the up and coming discipline for the 22nd century. But exactly what is service? Many people think that service is what people do no more no less. Nothing can be farther from the truth. Then if so why is the service community in constant disarray? Startup businesses fail on a regular basis. Why? They simply do not provide good service. Many persons in responsible positions rarely give service even a brief notice. What they subconsciously think about service has to be the truth. How often do you hear exclamations like "I'll never fly again especially on that airline." What about "I've had it with fast food restaurants." Have you ever heard a student say "I'll never take another course from that professor." Or "it's a great car but the service stinks." What about "He may be a great doctor but he treats all patients like they are not human." So what do you do if you own or manage a small business and want to start off right? That's an easy question. You simply send new employees or even experienced ones to service school. You've heard of computer school but have you heard of service school? There are books on computer for example all over the place. But you probably have never seen one a book that is about service. Is an automobile dealership the same as a pharmacy? At the service level you can bet they are. This book will tell you all you need to know about providing great service. Have you ever heard of a 2-hour seminar on how to give good service? I bet you haven't. Sometimes a manager will give suggestions but that is about it. This book is a service resource. Have you experienced a doctor's office that calls a patient concerning what time his or her appointment is? Have you had a car dealer tell you they have lost your car? Has a doctor operated on the wrong leg? Maybe even the wrong person? A service is a client-provider interaction that creates and captures value for both participants. We use service in several aspects of our lives including business government education health care and religion. But what exactly are the best practices principles and theories of service? The actual study of service is a relatively new field but it is one that can open the door to a better understanding of the essential part of our lives. In this little book Harry Katzan Jr. founder and editor of the *Journal of Service Science* offers a concise readable examination of how managers can use information about services to construct a better customer environment. Harry Katzan Jr. believes that the characteristics of a service process determine its efficacy in solving real-world problems. He disseminates these characteristics and provides a

clear view of service to help managers pinpoint the exact issues they need to tackle With a comprehensive bibliography examples and a highly engaging writing style this little book on service provides is perfect for the professional and laymen alike Discover how you can put information about service to work for you **A Manager's Guide to Service Science** Harry Katzan,2008 A service is a client provider interaction that creates and captures value for both participants We use service in several aspects of our lives including business government education health care and religion But what exactly are the best practices principles and theories of service The actual study of service science is a relatively new field but one that can open the door to a better understanding of this essential part of our lives In this invaluable guide Harry Katzan Jr director of the Service Science Institute of Hilton Head offers a concise readable examination of how managers can use information about services to construct a better customer environment Harry Katzan Jr believes that the characteristics of a service process determine its efficacy in solving real world problems He disseminates these characteristics and provides a clearer view to help managers pinpoint the exact issues they need to tackle Informative chapters include Service Concepts Service Systems Information Services Service Management Service Business With a comprehensive bibliography detailed footnotes and a highly engaging writing style A Manager s Guide to Service Science is perfect for the professional and the layman alike Discover how you can put information about services to work for you
