Opinionated A Year Of Religious Critique:

Schopenhauer's Doctrine of Salvation in Relation to his Critique of Religion and Philosophical Teachings Anil Dominic Batti,2023-10-31 Arthur Schopenhauer 1788 1860 was perhaps the last polymath among the great Germanic philosophers Switching with ease and elegance between epistemic positions and fields as diverse as idealism and empiricism fideism and rationalism realism and nominalism art and religion jurisprudence and politics psychology and occultism Schopenhauer erected an imposing edifice bearing testimony to his universal learning This study is an investigation into the very conclusion of Schopenhauer s philosophy and endeavours to answer the following question did Schopenhauer s doctrine of salvation issue forth organically from his intellectual output or was it annexed to his philosophy as a result of his critical engagement with religion The labyrinthine paths through which Schopenhauer arrives at the soteriological culmination of his philosophy are subjected to critical assessment the picture that emerges is of a philosopher who seemed convinced that he had solved some of the most pressing cosmic riddles to have tormented mankind through the ages Studying Religion and Society Titus Hjelm,Phil Zuckerman,2013 How do you study religion and society In this fascinating book some of the most famous names in the field explain how they go about their everyday work of studying religions in the field They explain how the ideas for their projects and books have come together how their understanding of religion has changed over the years and how their own beliefs have affected their work They also comment on the changing nature of the field the ideas which they regard as most important and those which have not stood the test of time Lastly they offer advice to young scholars and suggest what needs to be done to enable the field to grow and develop further **New Approaches to the Analysis of Jihadism** Rüdiger Lohlker,2012 Jihadism has been an important issue of public discussions since 9 11 Internet media have been used by Jihadis as means of communication propaganda recruitment and even training purposes In this volume the processes of interaction on Jihadi internet sites are analysed Particular attention lays on the mechanisms of spreading propaganda via the internet by diverse technical means The process of transformation of Islamic knowledge into Jihadi knowledge the rhetorics of videos the development of South Asian Jihadi organisations and some conceptual issues are discussed **The Culture of Conservative Christian Litigation** Hans J. Hacker,2005-05-05 Over the past decade conservative Christian public law firms have been some of the most active and aggressive litigators in the nation Their efforts have impacted important policy areas including religion in the Public Square school prayer gay rights family values and abortion policy But the Fundamentalist Christian Evangelical social movement is not monolithic In this probing and judicious work Hacker explores and clarifies the influence of ideology on the goals and behavior of three leading conservative Christian law firms and how they differ in agendas and approach He provides rich interview narratives that shed light on interest group behavior and how it is influenced by internal group characteristics **Religion in Science Fiction** Steven Hrotic,2014-07-31 Religion in Science Fiction investigates the history of the representations of religion in science fiction

literature Space travel futuristic societies and non human cultures are traditional themes in science fiction Speculating on the societal impacts of as yet undiscovered technologies is after all one of the distinguishing characteristics of science fiction literature A more surprising theme may be a parallel exploration of religion its institutional nature social functions and the tensions between religious and scientific worldviews Steven Hrotic investigates the representations of religion in 19th century proto science fiction and genre science fiction from the 1920s through the end of the century Taken together he argues that these stories tell an overarching story a metanarrative of an evolving respect for religion paralleling a decline in the belief that science will lead us to an ideal and religion free future Science fiction s metanarrative represents more than simply a shift in popular perceptions of religion it also serves as a model for cognitive anthropology providing new insights into how groups and identities form in a globalized world and into how crucial a role narratives may play Ironically this same perspective suggests that science fiction as it was in the 20th century may no longer exist

Manufacturing Religion

Russell T. McCutcheon, 1997-06-19 In this new book author Russell McCutcheon offers a powerful critique of traditional scholarship on religion focusing on multiple interrelated targets Most prominent among these are the History of Religions as a discipline Mircea Eliade one of the founders of the modern discipline recent scholarship on Eliade s life and politics contemporary textbooks on world religions and the oft repeated bromide that religion is a sui generis phenomenon McCutcheon skillfully analyzes the ideological basis for and service of the sui generis argument demonstrating that it has been used to constitute the field s object of study in a form that is ahistoric apolitical fetishized and sacrosanct As such he charges it has helped to create departments jobs and publication outlets for those who are comfortable with such a suspect construction while establishing a disciplinary ethos of astounding theoretical naivete and a body of scholarship to match Surveying the textbooks available for introductory courses in comparative religion the author finds that they uniformly adopt the sui generis line and all that comes with it As a result he argues they are not just uncritical which helps keep them popular among the audiences for which they are intended but badly disserve but actively inhibit the emergence of critical perspectives and capacities And on the geo political scale he contends the study of religion as an ahistorical category participates in a larger system of political domination and economic and cultural imperialism

The Case for God

Karen Armstrong, 2009-09-22 NATIONAL BESTSELLER A nuanced exploration of the role of religion in our lives drawing on insights of the past to build a faith for our dangerously polarized age from the New York Times bestselling author of *The History of God* Moving from the Paleolithic age to the present Karen Armstrong details the great lengths to which humankind has gone in order to experience a sacred reality that it called by many names such as God Brahman Nirvana Allah or Dao Focusing especially on Christianity but including Judaism Islam Buddhism Hinduism and Chinese spiritualities Armstrong examines the diminished impulse toward

religion in our own time when a significant number of people either want nothing to do with God or question the efficacy of faith Why has God become unbelievable Why is it that atheists and theists alike now think and speak about God in a way that veers so profoundly from the thinking of our ancestors Answering these questions with the same depth of knowledge and profound insight that have marked all her acclaimed books Armstrong makes clear how the changing face of the world has necessarily changed the importance of religion at both the societal and the individual level Yet she cautions us that religion was never supposed to provide answers that lie within the competence of human reason that she says is the role of logos The task of religion is to help us live creatively peacefully and even joyously with realities for which there are no easy explanations She emphasizes too that religion will not work automatically It is she says a practical discipline its insights are derived not from abstract speculation but from dedicated intellectual endeavor and a compassionate lifestyle that enables us to break out of the prism of selfhood

Criticism of Earth Roland Boer,2012-06-08 Criticism of Earth thoroughly reassesses Marx and Engels s engagement with theology drawing on largely ignored texts Thus alongside opium of the people Hegel s philosophy of law and the Feuerbach theses other works are also central These include Marx s early pieces on theology continual transformations of fetishism and lengthy treatments of Bruno Bauer and Max Stirner Engels too is given serious attention since he moved beyond Marx in appreciating theology s revolutionary possibilities Engels s Calvinism is discussed his treatments of biblical criticism and theology and his later writings on early Christianity s revolutionary nature The book continues the project for a renewed and enlivened interaction between Marxism and religion being the fourth of five volumes in the Criticism of Heaven and Earth series
