Community based research in sport, exercise and health science Robert J. Schinke, Kerry McGannon, Brett Smith, 2016-01-08 Community based research has recently gained attention within the sport and exercise sciences When seeking to understand community based research methodologies one finds a diversity of approaches spanning a breadth of ontological views and equally diverse methodological approaches Though little is known about community based sport exercise and physical activity research these foci are beginning to gain scholarly attention in part through the emerging sport for development and peace literature This book features a conceptual introduction and eight pioneering examples of community based research from North American European and Oceanic scholars The topic matter reveals scholarship undertaken in relation to health physical activity youth sport and elite sport exemplifying work with mainstream and marginalized populations This book perhaps the first compilation of community based research relating to sport exercise and health will be of interest to sociologists of sport sport and exercise psychology scholars sport management scholars qualitative researchers health scholars and practitioners sport for development organizations and research ready communities seeking to engage in localized research projects This book was published as a special issue of *Qualitative Research in Sport Exercise and Health* **Golf University** Scott Weems, 2019-05-07 In *Golf University* Scott Weems offers

comprehensive advice to excelling on the golf course that takes readers beyond traditional tips on putting and driving. Divided into four academic years, this book incorporates the disciplines of physics, math, medicine, sociology, geology, economics, and more to help golfers maximize their success and have the most fun. Some of the many lessons that Weems offers include: Achieving maximum efficiency in the golf swing meaning no loss of kinetic energy from club to ball would require a driver 72 feet long. And a club the same weight as the ball. Twelve percent of business executives rate golf as more important than sex. Players shot half a stroke higher when paired with Tiger Woods in his prime. The effect was even worse on the final day of competition. Putting against the direction of the grain, i.e. opposite the most recent mowing, leaves the ball 15 percent shorter than putting in the opposite direction. Closing your eyes occasionally while putting will leave your ball almost 10 percent closer to the pin. And more. Golf University uses a mixture of research, interviews, and Weems's own experiences as a scientist and golfer to introduce readers to the latest discoveries in the sport.
