America, the Owner's Manual Bob Graham,Chris Hand,2016-07-15 In 2016 Americans fed up with the political process vented that frustration with their votes Republicans nominated for president a wealthy businessman and former reality show host best known on the campaign trail for his sharp rhetoric against immigration and foreign trade Democrats nearly selected a self described socialist who ran on a populist platform against the influence of big money in politics While it is not surprising that Americans would channel their frustrations into votes for contenders who pledge to end business as usual the truth is that we don t have to pin our hopes for greater participation on any one candidate All of us have a say if we learn master and practice the skills of effective citizenship One of the biggest roadblocks to participation in democracy is the perception that privileged citizens and special interests command the levers of power and that everyday Americans can t fight City Hall That perception is undoubtedly why a 2015 Pew Charitable Trusts survey found that 74 percent of those Americans surveyed believed that most elected officials didn t care what people like them thought Graham and Hand intend to change that conventional wisdom by showing citizens how to flex their citizenship muscles They describe effective citizenship skills and provide tips from civic experts Even more importantly they offer numerous examples of everyday Americans who have used their skills to make democracy respond The reader will see themselves in these examples of citizens who chose to be victorious participants rather than tranquil spectators in the arena of democracy By the end of the book you will have new confidence that citizen participation is the lifeblood of America and will be ready to make governments work for you not the other way around

The Codex of the Endangered Species Act Lowell E. Baier, 2023-07-25 The Endangered Species Act of 1973 ESA is one of the most cherished and reviled laws ever passed It

mandates protection and preservation of all the nation's species and biodiversity whatever the cost. It has been a lightning rod for controversy and conflicts between industry business and environmentalists. The year 2023 marks the 50th anniversary of this law and provides an opportunity for a measured and thorough evaluation thereof. We cannot know today's challenges and opportunities without understanding their histories. This book is the most comprehensive history of the ESA ever published and the first to consider the entire history of the law from all angles in a single volume. The history of the ESA has been one of increasing impact, complexity and controversy. In 1978 the Supreme Court declared that Congress intended for the U.S. government to save all species at any cost and thereafter application of the ESA became steadily more controversial as seen in the example of the northern spotted owl and the timber wars in the Pacific Northwest in the late 1980s and early 90s and then everywhere as the ESA became a political football in the highly partisan environment of the late 1990s and amendments to the law ceased. This book is not only a history but a call to action. It will take more conservation, more funding and more innovative solutions if we are to save our wildlife and biodiversity. It will take the engagement of every American to muster the collective will to meet this challenge. The hope of this book is that we will be able to look back and say that we accomplished more in the second 50 years of the ESA than we did in the first.

[The Handbook of Forensic Mental Health in Africa](#) Adegboyega Ogunwale, Adegboyega Ogunlesi, Stephane Shepherd, Katrina Serpa, Jay Singh, 2021-06-17. The Handbook of Forensic Mental Health in Africa traces the history of forensic mental health in Africa, discussing the importance of considering cultural differences when implementing Western validated practices on the continent while establishing state of the art assessment and treatment of justice involved persons. Experts in the field of forensic mental health throughout Africa explore the current state of forensic mental health policy and service provision as well as the unique ethical challenges which have arisen with the recent growth of interest in the field. The African and international research literature on violence risk assessment, competency to stand trial, malingering assessment, Not Guilty by Reason of Insanity (NGRI) evaluations, report writing as an expert witness and mental health legislation in the context of forensic practice are explored throughout. Finally, future directions for forensic mental health in Africa are discussed for juvenile female and elderly offenders. This text is ideal for mental health, criminal justice and legal professionals working in clinical, research and policy contexts.
