Supporting Workplace Learning Rob F. Poell, Marianne van Woerkom, 2011-01-19 During the 1990s the workplace was rediscovered as a rich source of learning The issue of workplace learning has since received increasing attention from academics and practitioners alike but is still under researched empirically This book brings together a range of state of the art research papers addressing interventions to support learning in the workplace The authors are experienced international scholars who have an interest in making HRD and workplace learning practices more evidence based through practical relevant research Although workplace learning is largely an autonomous process many organizations want to manage it as part of their broader HRD strategy There are limits however to the extent to which the complex dynamics of learning in the workplace can be guided in pre determined desirable directions This tension between the possible strengths of workplace learning and the limits of managing it is at the heart of this volume The book is broken into three sections The first section deals with workplace learning interventions including HRD practitioners strategies training and development activities and e learning programs The second section investigates the impact of social support or lack thereof in workplace learning such as mentoring coaching and socialization practices The third section addresses collective learning in the workplace looking at teams knowledge productivity and collaborative capability building

Monthly Catalog of United States Government Publications ,1993 Trends in Training Brian J. O'Leary, Bart L. Weathington, 2015-09-04 In the modern workplace millions of dollars are spent each year on employee training All too often however little thought and effort is spent on evaluating training and ensuring that the correct training is taking place Successful training is about understanding both organizational goals and employee behavior The basis for this book is the 9th Annual River Cities Industrial and Organizational Psychology Conference held on the campus of The University of Tennessee at Chattanooga in October 2013 The theme of the conference was Trends in Training Accordingly the focus of many of the talks was on how to train people to thrive and succeed in the environment where they spend a large portion of their lives the workplace Technical Abstract Bulletin Defense Documentation Center (U.S.), 1964 **Jets From Young Stars V** José Gracia, Fabio de Colle, Turlough

Downes, 2009-10-30 Studying the complex physical systems of stellar jets necessitates the incorporation of nonlinear effects which occur on a wide variety of length and timescales One of the primary methods used to study the physics of jets is numerical simulations that apply high performance computing techniques Such techniques are also required for analysing the huge modern astrophysical datasets This book examines those computing techniques It is a collection of the lectures from the fifth and final school of the JETSET network Jets From Young Stars V High Performance Computing in Astrophysics It begins with an introduction to parallel programming techniques with an emphasis on Message Passing Interface MPI before it goes on to review grid technology techniques and offer a practical introduction to Virtual Observatory The second half of the book then is devoted to applications of high performance computing techniques including 3D radiation transfer to jet and
