Teacher Quality and Education Policy in India Preeti Kumar, Alexander W. Wiseman, 2021-03-31 By drawing on quantitative data and qualitative analyses of five major national education policies implemented in India over the last 15 years this comprehensive volume explores their impact on teacher quality and perceived effectiveness explaining how this relates to variations in student performance Responding to a national agenda to increase the quality of the Indian teacher workforce *Teacher Quality and Education Policy in India* critically questions the application of human capital theory to Indian education policy Chapters provide in depth and strategically structured analyses of five national policies including the recently approved National Education Policy NEP 2020 to see how Indian policymakers use teacher quality as a driver and measurement of education and national economic development Ultimately the text offers evidence based policy recommendations to improve teacher quality in India suggesting that while all five policies have contributed significant frameworks and recommendations for teacher quality reform they have failed to move beyond a symbolic function Given its rigorous methodological approach this book will be a valuable addition to the under researched question of education policymaking in postcolonial contexts It will be an indispensable resource not only for scholars working on policymaking in the Indian context but also for those working at the intersection of education teacher development and policymaking in developing countries

Makridis,2023-02-07 Despite decades of increased state and federal funding for education student outcomes have largely deteriorated according to the 2022 NAEP exam results reading and math capabilities hit a thirty year low The emerging workforce is less prepared to handle the increasingly complex demands of the future which is likely to accelerate income inequality and stifle our nation s economic and social competitiveness Presenting the latest research on the economics of K 12 education this book makes recommendations about specific educational programming that have shown potential in increasing student outcomes for all learners focusing on human capital and practical

recommendations for state and local policy makers and educational leaders **Annual Review of Comparative and International Education 2018** Alexander W. Wiseman,2019-09-27 This year s edition brings together research and essays on comparative education trends and directions written by professional and scholarly leaders in the field Topics covered include theoretical and methodological developments reports on research to practice area studies and the diversification of comparative and international education *Human Capital and Gender Inequality in Middle-Income Countries* Elizabeth M.

King,Dileni Gunewardena,2022-11-25 The role of cognitive and socioemotional skills alongside education in determining people s success in the labour market has been the topic of a growing body of research but previous studies have mostly missed middle income countries and the developing world because measures of those skills and data on employment and earnings on large enough samples of adults have typically not been available Using comparable survey data on these schooling skills and labour market outcomes from 13 developing and emerging economies worldwide this book revisits

human capital and gender inequality models It presents new estimates of the returns to different levels of schooling as well as cognitive and socioemotional skills for women and men It examines whether those returns are due to levels of human capital or to structural bias in labour markets and how these two factors work across the earnings spectrum The book examines the existence of glass ceilings and sticky floors for women using this expanded measure of human capital Further by analyzing a group of countries of wide ranging levels of economic development and socio political contexts the book reveals patterns and insights into how context mediates the relationship between skills and gender gaps in labour market outcomes This book will be of interest to scholars of human capital and gender inequality in the labour market and development economics as well as gender and development policy makers
