

## Sample Essay on Cultural Identity

As has been documented by numerous professionals, culture plays a key role during the definition of a particular community or a given group of people. Cultural identity is used in reference to how people from a particular setting lead their lives (Chapter 1 4). Culture also greatly influences how people communicate with each other and it is worth noting that methods of communication vary from one culture to the next. As such, what is deemed acceptable by one culture and community, may not be necessarily accepted in the other. Culture also plays a significant role in intercultural communication.

Culture as a historically shared system of symbolic resources from which people derive and construct meaning of their worlds. Systems, symbolic resources, and making the world meaningful are the most important aspects of this definition. Every culture found in a community or a society must be made up of a variety of systems through which it functions. The systems may be composed of communication systems, leadership systems, academic systems, and other social systems and they generally help to complete the society. Symbolic resources, on the other hand, are the actual artifacts or features that make a culture unique and they may include the unique dressing code, practices such as cultural dances and cherished attires, as well as the national flag. People's view of their world tends to differ and this is shaped by how people in different societies tend to view or think of other people from other societies.

Of high importance is the comprehension of diverse cultures so as to be able to live amicably with people from other cultures. Cultural identity is an element that is brought about when a person comprehends their own culture and this helps the person to also comprehend and appreciate the culture of other people as well. In addition, it promotes the vital art of communication between people who are living in one place but come from different cultures (Chapter 1 6). This is why this

**Post-Apocalyptic Cultures** Julia Urabayan, Jorge León

Casero, 2024-03-19 This book advocates for the necessity of recovering the value of utopias as political projects that open new channels of action. The criticism of modern political utopias is based on the supposed impossibility of creating for the future because there is no longer a future apocalyptic ideology. However, this edited collection seeks to show that the post-apocalyptic world in which we live entails a renewed freedom of design for the radical reorganization of institutions. Post-apocalyptic cultures are not obligated to follow the capitalist anthropocentric correlationist and sovereign modes of the old political project of emancipation, the Western enlightenment that has started to collapse. With this in mind, this book is divided into four sections dedicated to the main themes from which to rethink the projects of political emancipation that are possible nowadays: technopolitics, posthumanist biopolitics, non-western politics, and the crossover between arts and politics. The Vassar Miscellany, 1912

*European Thought and Culture, 1350-1992* Michael J. Sauter, 2021-06-06 This book explores the main currents of European thought between 1350 and 1992, which it approaches in two principal ways: culture as produced by place and the progressive unmooring of thought from previously set religious and philosophical boundaries. The book reads the period against spatial thought's history: spatial sciences such as geography or Euclidean geometry to argue that Europe cannot be understood as a continent in intellectual terms or its history organized with respect to traditional spatial geographic categories. Instead, we need to understand European intellectual history in terms of a culture that defined its own place as opposed to a place that produced a given culture. It then builds on this idea to argue that Europe's overweening drive to know more about humanity and the cosmos continually breached the boundaries set by venerable religious and philosophical traditions. In this respect, spatial thought foregrounded the human at the unchanging's expense, with European thought slowly becoming unmoored as it doggedly produced knowledge at wisdom's expense. Michael J. Sauter illustrates this by pursuing historical themes across different chapters, including European thought's exit from the medieval period, the Renaissance, the Reformation, the Scientific Revolution, the Enlightenment, and Romanticism, the Industrial Revolution, and war and culture, offering a thorough overview of European thought during this period. The book concludes by explaining how contemporary culture has forgotten what early modern thinkers such as Michel de Montaigne still knew: namely, that too little skepticism toward one's own certainties makes one a danger to others. Offering a comprehensive introduction to European thought that stretches from the late fourteenth to the late twentieth century, this is the perfect one-volume study for students of European intellectual history.

**Francophone Cultures and Geographies of Identity** Zsuzsanna Fagyal, H. Adlai

Murdoch, 2014-07-03 This collection of original essays challenges French-centered conceptions of francophonie as the shaping force of the production and study of the French language, literature, culture, film, and art, both inside and outside mainland France. The traditional view of francophone cultural productions as offshoots of their hexagonal avatar is replaced by a pluricentric conception that reads interrelated aspects of francophonie as products of specific contexts, conditions, and

local ecologies that emerged from post colonial encounters with France and other colonizing powers The twenty one papers grouped into six thematic parts focus on distinctive literary linguistic musical cinematographic and visual forms of expression in geographical areas long defined as the peripheries of the French speaking world the Caribbean the Indian Ocean the Maghreb sub Saharan Africa Quebec and hexagonal cities with a preponderance of immigrant populations These contested sites of French collective identity offer a rich formulation of distinctly local francophone identities that do not fit in with concepts of linguistic and ethnic exclusiveness but are consistent with a pluralistic demographic shift and the true face of Frenchness that is indeed plural

**Culture & Rhetoric** Ivo A. Strecker, Stephen A. Tyler, 2009 While some scholars have said that there is no such thing as culture and have urged to abandon the concept altogether the contributors to this volume overcome this impasse by understanding cultures and their representations for what they ultimately are rhetorical constructs These senior international scholars explore the complex relationships between culture and rhetoric arguing that just as rhetoric is founded in culture culture is founded in rhetoric This intersection constitutes the central theme of the first part of the book while the second is dedicated to the study of figuration as a common ground of rhetoric and anthropology The book offers a compelling range of theoretical reflections historical vistas and empirical investigations which aim to show how people talk themselves and others into particular modalities of thought and action and how rhetoric and culture in this way are co emergent It thus turns a new page in the history of academic discourse by bringing two disciplines anthropology and rhetoric together in a way that has never been done before Publisher's website

**Human Assessment and Cultural Factors** John W. Berry, S.H. Irvine, 2013-11-11 Against the background of NATO's Istanbul conference of 1971 Cronbach and Drenth 1972 the Kingston conference shows that great progress has been made by the community of cross cultural psychologists The progress is as much in the psychology of the investigators as in the investigations being reported In 1971 the investigators were mostly strangers to each other Behind their reports lay radically different field experiences disparate research traditions and mutually contradictory social ideals Istanbul was not a Tower of Babel but participants did speak past each other Now a community exists thanks to the meetings of NATO and the International Association for Cross Cultural Psychology to flourishing journals and the Triandis et al 1980 Handbook The members tend to know each other can anticipate how their formulations will fall on the ears of others and accept superficially divergent approaches as making up a collective enterprise Ten years ago there was open conflict between those who confronted exotic peoples with traditional tests and applied traditional interpretations to the responses and the relativists who insisted that tasks test taking and interpretation cannot be standardized in the ways that matter Today's investigators are conscious of the need to revalidate tasks carried into alien settings they often prefer to redesign the mode of presentation and to attune the subject to test taking They face the difficulties squarely and recognize that even the best means of coping are only partially successful
