New Qatar Civil Defence Regulations:

European Regulation of Aerodrome Safety Management Systems in the EASA System Henning

Pfisterer, 2017-12-18 The implementation of Safety Management Systems at international airports was one of the most considerable changes in the regulatory framework for the operation and licensing of aerodromes in recent years. However, even more than five years after its inception, it appears that the high expectations ICAO has placed on what has been designed as a paradigm shift in the way of doing business in the airport industry were not materializing and Safety Management Systems appear at best to only marginally impact the safety performance of airports. Based on the lessons learned from the implementation of SMS in Germany, an ideal organizational set up for a most effective aerodrome SMS shall be designed. This proposal of an ideal organizational set up shall be validated through a model implementation at a representative airport and subsequent long term observation in live operation. This model implementation serves as a basis from which recommendations for a future European regulation of Aerodrome Safety Management Systems under the EASA system shall be derived.

Environmental Law in Arab States Damilola Sunday Olawuyi, Damilola Olawuyi, 2022

Environmental Law in Arab States offers a comprehensive and authoritative account of the guiding principles and rules relating to environmental protection in the Arab region. Taking an international and comparative approach, the book introduces readers to the latest developments of environmental law across the Arab region through applicable legislation, green finance and climate technologies. The impact of these is assessed in each of the major areas of environmental regulation: air pollution, water pollution, biodiversity conservation, nature and cultural heritage, infrastructure development and Islamic ecology. Consideration is given to participatory and bottom-up legal strategies focusing on transparency, accountability, gender justice and other human rights safeguards that are needed to achieve greater coherence and coordination in the implementation and enforcement of environmental regulation across the region. The book closes by providing legal assessments and reflections on how Arab countries can, through clear and comprehensive legislation, advance existing national strategies and visions on trade and investment, green growth, Islamic green finance, circular economy, blue economy and low carbon future, amongst others.
