Controlling Capital Nicholas Dorn, 2016-02-12 Controlling Capital examines three pressing issues in financial market regulation: the contested status of public regulation, the emergence of culture as a proposed modality of market governance, and the renewed ascendancy of private regulation. In the years immediately following the outbreak of crisis in financial markets, public regulation seemed almost to be attaining a position of command, the robustness and durability of which is explored here in respect of market conduct, European Union capital markets union, and US and EU competition policies. Subsequently, there has been a softening of command and a return to public-private co-regulation positioned within a narrative on culture. The potential and limits of culture as a regulatory resource are unpacked here in respect of occupational and organisational aspects, stakeholder connivance, and wider political embeddedness. Lastly, the book looks from both appreciative and critical perspectives at private regulation through financial market associations, arbitration of disputes, and most controversially, market policing by hedge funds. Bringing together a distinguished group of international experts, this book will be a key text for all those concerned with issues arising at the intersection of financial markets, law, culture, and governance.

The Political Ecology of Informal Waste Recyclers in India Federico Demaria, 2023-06-26 Waste is increasingly a site of social conflict. The questions related to waste management are not merely technical; what, how, where, and by whom become intrinsically political questions. This book is about the power relations in recycling from the viewpoint of political ecology and ecological economics. Informal waste recyclers are invisible for citizens and public policy. This book focuses on environmental conflicts involving them with two emblematic case studies from India. Firstly, ship breaking, where the metabolism of a global infrastructure, namely shipping, shifts social and environmental costs to very localized communities in order to obtain large profits. Secondly, the conflict around municipal solid waste management in Delhi shows how environmental costs are shifted to urban residents and recyclers are dispossessed of their livelihood source: recyclable waste. The first is an example of capital accumulation by contamination, while the second involves both dispossession and contamination. The struggles of informal recyclers constitute an attempt to re-politicize waste metabolism beyond techno-managerial solutions by fostering counter-hegemonic discourses and praxis. The book presents a range of experiences, mostly in India, but with examples from all over the world to inform theory on how environments are shaped, politicized, and contested.

It's The Economy, Stupid Vicky Pryce, 2015-02-12 Pollsters are constantly worrying about our perceptions of politicians What do their other halves look like Who looks best when eating a bacon sandwich Should they even be eating bacon sandwiches in the first place For the voter though it all comes down to one thing the economy While good economic news can send popularity sky rocketing bad performance can blight a party's election chances for years But with policies often working with time lags it's rarely clear who is responsible for what especially when their stances on the biggest issues of the day immigration the EU the NHS are clouded in rhetoric rather than grounded in hard economic fact It's the Economy Stupid sets out to change all that This incisive accessible guide explodes some of the most entrenched myths of British political debate Does immigration help or harm our economy Are austerity measures the best way to tackle a financial meltdown Is the NHS in crisis With answers to all these questions and more this is essential reading for anyone who wants to know how their vote will affect their financial future

The Rise of Africa's Middle Class Henning Melber, 2016-12-15 Across Africa a burgeoning middle class has become the poster child for the Africa rising narrative Ambitious aspirational and increasingly affluent this group is said to embody the values and hopes of the new Africa with international bodies ranging from the United Nations Development Programme to the World Bank regarding them as important agents of both economic development and democratic change This narrative however obscures the complex and often ambiguous role that this group actually plays in African societies Bringing together economists political scientists anthropologists and development experts and spanning a variety of case studies from across the continent this collection provides a much needed corrective to the received wisdom within development circles and provides a fresh perspective on social transformations in contemporary Africa

Wall Street, Reforming the Unreformable David E McClean, 2015-10-06 McClean argues that a collective move towards stewardship within the financial industry is necessary to restore ethical behaviour and public confidence Drawing on practical examples and offering new policy recommendations this unique philosophical study paints a picture of what a truly ethical trading culture of the future might look like

The Economics of the Global Response to HIV/AIDS Markus Haacker, 2016-09-01 The global response to HIV AIDS has been a major aspect of global health and development policy over the last three decades The book illustrates the devastating health impacts of the epidemic with life expectancy in some countries falling to the lowest levels observed anywhere and the remarkable success of the global HIV AIDS response in reversing such extreme outcomes Concerns about the implications of HIV AIDS for economic development have played a role in motivating the global HIV AIDS response However evidence on the impacts of HIV AIDS on economic growth or poverty is weak and the magnitude and relevance of such economic effects appears trivial compared to the consequences for life and health Because of the success in extending access to treatment globally HIV AIDS has effectively transitioned into a chronic disease This means that HIV AIDS absorbs not only a substantial chunk of current global and national financial resources but that these spending needs are projected to persist over decades The costs of the HIV AIDS response thus resemble a long term financial liability shaped by past and current policies Relatedly the calculus of cost effectiveness of HIV AIDS interventions has changed People who become infected with HIV can now expect to not die because of AIDS at the same time each HIV infection results in medical needs and expenditures extending over decades The book presents a framework for integrating these financial consequences and the transmission dynamics of HIV in the analysis of cost effectiveness of HIV AIDS interventions and in the design of HIV AIDS programs

The G20 and the Future of International Economic Governance Mike Callaghan, Tristram Sainsbury, 2015-10-01 The G20 needs to be bold and pragmatic if it is to deal effectively with the global economy's big issues Since its establishment in 1999 the G20 has become a key international forum But it

suffers from inherent design flaws and remains a work in progress When Australia began its presidency of the 2014 summit in Brisbane many commentators suggested that Australia's chairing of the G20 would reinvigorate it This timely book looks at what was achieved at the Brisbane Summit and what has happened in its wake Crucially it explores what role the G20 could and should play in dealing with such pressing global issues as international taxation trade energy and climate change Expert contributors many of them former inside players assess the impact of the summit in the context of the year's broader geopolitical challenges including Russia's temporary expulsion from the G8 and the failure of the US to ratify its governance reforms to the IMF Taking stock contributors question the effectiveness of the G20 and identify the reforms that are needed if it is to offer strong leadership in an integrated global economy Together they ask what is the future of the G20 and other Gs

Hitmen for Hire Mark Shaw, 2017-07-10 *Hitmen for Hire* takes the reader on a journey like no other

navigating a world of paid hitmen informers rogue policemen criminal taxi bosses gang leaders and crooked politicians and businessmen Criminologist Mark Shaw examines a society in which contract killings have become commonplace looking at who arranges hits where to find a hitman and even what it is like to operate as a hitman or woman Since 1994 South Africa has seen a worrying increase in the commercialisation of murder and has been rocked by several high profile contract killings Drawing on his research of over a thousand incidents of hired assassinations from 2000 to 2016 Shaw reveals how these murders are used to exert a mafia type control over the country's legal and illegal economic activity Contracted assassinations and the organised criminal activity behind them contain sinister linkages with the underworld most visibly in relation to disputes over tenders and access to government resources State security actors increasingly mediate relations between the under and upper worlds with serious implications for the long term success of the post apartheid democratic project

Bounded Rationality and Behavioural Economics Graham Mallard, 2015-08-14 Economics Nobel Laureate Herbert Simon developed the concept of bounded rationality in the 1950s This asserts that the cognitive abilities of human decision makers are not always sufficient to find optimal solutions to complex real life problems leading decision makers to find satisfactory sub optimal outcomes This was a foundational component of the development of Behavioural Economics but in recent years the two fields have diverged each with its own literature its own approach and its own proponents Behavioural Economics explores the areas of commonality between Economics and Psychology in terms of its focus and its approach whereas the bounded rationality literature largely analyses the implications of sub optimal decision making through the mathematically sophisticated methodology of mainstream Economics This book examines the nature and consequences of this divergence and questions whether this is a case of beneficial specialisation or whether it is unhelpful potentially stunting the development of some aspects of Economics It has been suggested that the major deficiency of Behavioural Economics is that it has failed to produce a single widely applicable alternative to constrained optimisation This book evaluates the extent to which this is the true and if it is the extent to which it is a product of the divergence between the two literatures It also seeks to identify commonalities between the two subjects and suggests avenues of research in Economics that would benefit from a re fusion of these two fields

The Political Economy of Euro-Mediterranean Relations Christos Kourtellis, 2015-08-06 The author analyses the implementation of the agricultural and industrial parts of the European

Neighbourhood Policy ENP in Egypt Tunisia and Morocco Following a sectoral approach to assess the implementation of the ENP he investigates which interest groups win and which lose from the policy

Contract Governance Stefan Grundmann, Florian Möslin, Karl Riesenhuber, 2015-07-23 This book introduces and develops Contract Governance as a new approach to contract theory While the concept of governance has already been developed in Williamson's seminal article it has ironically not received much attention in general contract law theory Indeed Contract Governance appears to be an important and necessary complement to corporate governance and in fact as the second equally important pillar of governance research in the core of private law With this in mind Grundmann Möslin and Riesenhuber provide a novel approach in setting an international and interdisciplinary research agenda for developing contract law scholarship Contract Governance focuses particularly on the ways in which a governance perspective leads to research questions that have been neglected in traditional contract law scholarship and how from a governance perspective the questions are dealt with in a different manner and style Combining substantive chapters and commentaries this collection of essays addresses an array of topics including third party impact and contract governance problems in herd behaviour governance of networks of contracts governance in long term contractual relationships contract governance and rule setting and contract governance and political dimensions

Common European Legal Thinking Hermann-Josef Blanke, Pedro Cruz Villalón, Tonio Klein, Jacques Ziller, 2015-09-24 Common European Legal Thinking emanates from the existence of a shared European legal culture as especially reflected in the existence of a common European constitutional law It denotes a body of individual constitutional principles written and unwritten that represent the common heritage of the constitutions of the Member States Taking into account the two major European organisations the Council of Europe and especially the European Union the essays of this Festschrift discuss a range of constitutional principles including the rule of law democracy and the exercise of political power in a multilevel system which recognises fundamental rights as directly applicable and supreme law Other essays examine the value of pluralism the commitment of private organisations to uphold public values principles or rules and the objectives and methods of a transnational science of administrative law These articles highlight the fact that the *Ius Publicum Europaeum* Commune is politically in the making which can often be seen in the shape of general legal principles The publication recognises the role of Albrecht Weber as a forerunner of Common European Legal Thinking

From Economics to Political Economy Tim B. Thornton, 2016-07-22 The discipline of economics has been increasingly criticized for its inability to illuminate the workings of the real world and to provide reliable policy guidance for the major economic and social challenges of our time A central problem in contemporary economics and a problem from which many of its other failings flow is its lack of plurality By a lack of plurality it is meant that contemporary economics lacks diversity in its methods theories epistemology and methodology It is also meant that economics has become far less interdisciplinary From Economics to Political Economy offers an explanation as to why economics has become so determinedly non pluralistic and

also gives considerable attention to exploring and evaluating promising strategies for reform. These strategies include developing a pluralist economics under the label of political economy within other social science departments such as departments of politics. Along the way the reader will learn about the worldwide student movement seeking greater pluralism in economics, encounter some dramatic case studies in intellectual suppression, gain a fuller sense of the nature of contemporary economics and explore the relationship between economics and other social sciences. This book is of interest to any social scientist, particularly those with interests in economics and politics.

The Images of the Consumer in EU Law
Dorota Leczykiewicz, Stephen Weatherill, 2016-01-28

This book consists of contributions exploring from different perspectives the images of the consumer in EU law. The images of the consumer form the foundation for various EU policies, more or less directly oriented towards the goal of consumer protection. The purpose of the volume is to establish what visions of the consumer there are in different contexts of EU law, whether they are consistent and whether EU law's engagement with consumer-related considerations is sincere or merely instrumental to the achievement of other goals. The chapters discuss how consumers should be protected in EU contract, competition, free movement and trade mark law. They reflect on the limits of the consumer empowerment rationale as the basis for EU consumer policy. The chapters look also at the variety of concerns consumers might have, including the cost of goods and services, access to credit, ethical questions of consumption, the challenges of excessive choice and the possibility to influence the content of regulatory measures, and explore the significance of these issues for the EU's legislative and judicial process.
