manuals and advertisements to identify the technological discourses and business models that formed Nintendo's Super Power. He also describes the cultural changes in video games during the 1990s that slowly eroded the love of gamer enthusiasts for the SNES as the Nintendo generation matured. Finally, he chronicles the many technological changes that occurred through the SNES's lifetime, including full motion video, CD-ROM storage, and the shift to 3D graphics. Because of the SNES platform's architecture, Arsenault explains, Nintendo resisted these changes and continued to focus on traditional gameplay genres.

Reimagining the Academic Library David W. Lewis, 2016-05-04 Academic libraries are in the midst of significant disruption. Academic librarians and university administrators know they need to change but are not sure how. Bits and pieces of what needs to happen are clear, but the whole picture is hard to grasp. *Reimagining the Academic Library* paints a simple, straightforward picture of the changes affecting academic libraries and what academic librarians need to do to respond to the changes. It would help to guide future library practice. The aim is to explain where academic libraries need to go and how to get there in a book that can be read in a weekend. David Lewis provides a readable survey of the current state of academic library practice and proposes where academic libraries need to go in the future to provide value to their campuses. His primary focus is on collections, as this is the area with the greatest opportunity for change and is the driver of most library cost. Lewis provides an accessible framework for thinking about how library practice needs to adjust in the digital environment. The book will be useful not only to academic librarians but also for librarians to share with presidents and provosts who are a concise source for understanding where and how to focus their expenditures on libraries.

Advanced Communication Systems and Information Security Mostafa Belkasmi, Jalel Ben-Othman, Cheng Li, Mohamed Essaaidi, 2020-11-05 This book constitutes selected papers of the Second International Conference on Advanced Communication Systems and Information Security (ACOSIS 2019) held in Marrakesh, Morocco, in November 2019. The 10 full papers and 10 short papers were thoroughly reviewed and selected from 94 submissions. The papers are organized according to the following topical sections: wireless communications and services, vehicular communications, channel coding, construction of error-correcting codes, intrusion detection techniques, wireless and mobile network security, applied cryptography.

6th European Conference of the International Federation for Medical and Biological Engineering Igor Lacković, Darko Vasic, 2014-09-02 This volume presents the Proceedings of the 6th European Conference of the International Federation for Medical and Biological Engineering (MBEC2014) held in Dubrovnik, September 7-11, 2014. The general theme of MBEC 2014 is "Towards new horizons in biomedical engineering." The scientific discussions in these conference proceedings include the following themes: Biomedical Signal Processing, Biomedical Imaging and Image Processing, Biosensors and Bioinstrumentation, Bio-Micro-Nano Technologies, Biomaterials, Biomechanics, Robotics, and Minimally Invasive Surgery, Cardiovascular, Respiratory, and Endocrine Systems Engineering, Neural and Rehabilitation Engineering, Molecular, Cellular, and Tissue Engineering, Bioinformatics, and Computational Biology, Clinical Engineering, and Health Technology Assessment.

Health Informatics E Health and Telemedicine Biomedical Engineering Education *Color Vision Sensation and Perception* Marcelo Fernandes Costa, 2016-09-15 Color vision is considered a microcosm of the visual science Special physiological and psychological processes make this scientific topic an intriguing and complex research field that can aggregate around molecular biologists neurophysiologists physicists psychophysicists and cognitive neuroscientists Our purpose is to present the frontier knowledge of this area of visual science showing in the end the future prospects of application and basic studies of color perception **Colour and Form Perception: Straddling the Boundary** Galina V. Paramei, Cees van Leeuwen, 2016-05-31 Starting from psychophysics over the last 50 years most progress in unravelling the mechanisms of color vision has been made through the study of single cell responses mainly in LGN and striate cortex A similar development in the study of form perception may seem to be underway centred on the study of temporal cortex However because of the combinatorial characteristics of form perception we are also observing the opposite tendency from single cell activity to population coding and from static receptive field structures to system dynamics and integration and ultimately a synthetic form of psychophysics of color and form perception From single cells to system integration it is this development the present Research Topic wishes to highlight and promote How does this development affect our views on the various attributes of perception In particular we are interested in to what extent evolving knowledge in the field of color perception is relevant within a developing integrative framework of form perception The goal of this Research Topic is to bring together experimental research encompassing both color and form perception For this volume we planned a broad scope of topics on color in complex scenes color and form as well as dynamic aspects of form perception We expect that the Research Topic will be attractive to the community of researchers whose work straddles the boundary between the two visual perception fields as well as to the wider community interested in integrative systems neuroscience **Handbook of Research on Individualism and Identity in the Globalized Digital Age** Topor, F. Sigmund, 2016-08-15 Globalization has shifted perspectives on individualism and identity as cultural exchange occurs more rapidly in an age of heightened connectivity As technology connects those around the world it too helps to provoke a shift in the autonomy of individuals The Handbook of Research on Individualism and Identity in the Globalized Digital Age is an essential resource for researchers professionals and graduate level students This book explores and explains how globalization has impacted humans with specific emphasis on education and human development This research based publication presents critical perspectives on universal changes that are occurring due to globalization **Radiation Sensors with 3D Electrodes** Cinzia Da Vià, Gian-Franco Dalla Betta, Sherwood Parker, 2019-01-17 Written by the leading names in this field this book introduces the technical properties design and fabrication details measurement results and applications of three dimensional silicon radiation sensors Such devices are currently used in the ATLAS experiment at the European Centre for Particle Physics CERN for particle tracking in high energy physics These sensors are the radiation hardest devices ever fabricated and have applications in ground

breaking research in neutron detection medical dosimetry and space technologies and more Chapters explore the essential features of silicon particle detectors interactions of radiation with matter radiation damage effects and micro fabrication in addition to a providing historical overview of the field This book will be a key reference for students and researchers working with sensor technologies Features The first book dedicated to this unique and growing subject area which is also widely applicable in high energy physics medical physics space science and beyond Authored by Sherwood Parker the inventor of the concept of 3D detectors Cinzia Da Vi who has brought 3DSi technology to application and Gian Franco Dalla Betta a leading figure in the design and fabrication technology of these devices Explains to non experts the essential features of silicon particle detectors interactions of radiation with matter radiation damage effects and micro fabrication
