Anatomy of the Respiratory System

Name: _____ Date: _____

Upper and Lower Respiratory System Structures

1. Label upper respiratory structures (anatomical structures) shown in the image below.

2. Why is the pharynx described as a "crossroad" for the respiratory and digestive tracts?

The pharynx is a common pathway for both the respiratory and digestive tracts. It is located at the base of the skull and is the point where the two tracts meet. The respiratory tract leads to the lungs, and the digestive tract leads to the stomach. The pharynx is the only place where the two tracts overlap.

3. Why is the larynx described as the "voice box"?

The larynx is the part of the respiratory tract that produces sound. It is located in the neck and is made up of cartilage and muscle. The vocal cords are located in the larynx, and they vibrate to produce sound when air passes through them.
4. Name the cartilages of the larynx (the "voice box").

 - Epiglottic cartilage
 - Cricoid cartilage
 - Thyroid cartilage
 - Hyoid cartilage
5. The trachea is the windpipe. What is its function?

The trachea is the windpipe, and its function is to carry air from the larynx to the lungs. It is made up of cartilage and muscle, and it is lined with cilia (tiny hair-like structures) that help to move mucus and debris out of the respiratory tract.

Home Care Aide, 1995 An aid to learning which provides home care aides with information needed to manage client emergencies Information is given in this text with illustrations accompanying each step and key points are highlighted in this text to try and allow students to locate and use the information more easily *Care of the Critically Ill Patient* J. Tinker, M. Rapin, 2013-04-17 During the past decade there has been a considerable expansion in the understanding assessment and treatment of critically ill patients An attempt to portray our present knowledge of this diverse field in a comprehensive textbook is therefore a formidable and daunting undertaking However many colleagues in different disciplines and from different countries convinced us of the need for such a work and greatly encouraged by their interest we embarked upon the project Any single text even a very long one cannot cover every aspect of critical illness Our first task was therefore to define those areas of the subject that had to be included This we did on a systematic basis and although the final emphasis of the book is very largely directed to clinical matters we felt it pertinent to include in some detail accounts of relevant physiology and technology *Care of the Critically Ill Patient* is divided into twelve sections each concerned with major facets of critical illness each of the sixty eight chapters includes a topical and often extensive bibliography The many chosen contributors form an international group of specialists whose combined expertise embraces the topics that we have selected **Index**
