Play provides young children with the opportunity to express their ideas, symbolize and test their knowledge of the world. It provides the basis for inquiry in literacy, science, social studies, mathematics, art, music, and movement. Through play, young children become active learners engaged in explorations about themselves, their community, and their personal social world. *An Integrated Play Based Curriculum for Young Children* offers the theoretical framework for understanding the origins of an early childhood play-based curriculum and how young children learn and understand concepts in a social and physical environment. Distinguished author Olivia N. Saracho then explores how play fits into various curriculum areas in order to help teachers develop their early childhood curriculum using developmentally and culturally appropriate practice. Through this integrated approach, young children are able to actively engage in meaningful and functional experiences in their natural context. Special Features Include: Vignettes of children's conversations and actions in the classroom; Suggestions for activities and classroom materials; Practical examples and guidelines; End of chapter summaries to enhance and extend the reader's understanding of young children. By presenting appropriate theoretical practices for designing and implementing a play-based curriculum, *An Integrated Play Based Curriculum for Young Children* offers pre-service teachers the foundational knowledge about the field, about the work that practitioners do with young children, and how to best assume a teacher's role effectively. Marie L. Masterson, 2025 This book presents an expanded view of infant and toddler development to equip educators with the knowledge, dispositions, and skills to create high quality settings and interactions so that every child can have the best start in life. Readers are encouraged to consider the perspective of the child: What does this classroom, this teacher, and this experience look like and feel like to each child? How do teachers develop deeper understanding of development and learning in the context of children's families, cultures, and lives, and apply this knowledge to teaching decisions? Each chapter offers resources, research, teaching tips, activities to empower children, and questions for reflection and discussion. This book addresses the need for cultural safety and coherence between families and programs, the need for rich language and learning opportunities throughout the day, strategies for observing children, and using this information to design curriculum, individualized interactions to facilitate play-based learning, and teaching strategies that strengthen each child's emerging skills and capabilities. Book Features: Shows how cultural beliefs, child-rearing practices, and language are active prime movers in infant and toddler teaching decisions and must be made visible through reflective practice. Illustrates insightful and caring strategies for building authentic relationships with families to guide planning and decision making. Applies NAEYC's developmentally appropriate practice position statement 2020 to the complex challenges encountered by teachers working with infants and toddlers and their families. Reimagines teaching through the lens of collaboration and creative thinking, anchoring these as essential foundations of active play, outdoor and nature play, and health and well-being.
