South Africa's Post-Apartheid Military Lindy Heinecken, 2020-01-01 This timely book examines how the South African National Defence Force has adapted to the country's new security political and social environment since 1994. In South Africa's changed political state, how has civilian control of the military been implemented and what does this mean for defence in a democracy? This book presents an overview of the security environment, how the mission focus of the military has changed and the implications for force procurement, force preparation, force employment and force sustainability. The author addresses other issues such as the effect of integrating former revolutionary soldiers into a professional armed force, the effect of affirmative action on meritocracy, recruitment and retention, military veterans looking at the difficulties they face in reintegrating back into society and finding gainful employment, gender equality and mainstreaming, the rise of military unions and why a confrontational instead of a more corporatist approach to labour relations has emerged, HIV/AIDS and the consequences this holds for the military in terms of its operational effectiveness. In closing, the author highlights key events that have caused the SANDF to become lost in transition and transformation, spelling out some lessons learned. The conclusions she draws are pertinent for the future of defence security and civil-military relations of countries around the world.

Authoritarian Populism and the Rural World Ian Scoones, Marc Edelman, Saturnino M. Borrás Jr., Lyda Fernanda Forero, Ruth Hall, Wendy Wolford, Ben White, 2021-06-29 The rise of authoritarian nationalist forms of populism and the implications for rural actors and settings is one of the most crucial foci for critical agrarian studies today, with many consequences for political action. Authoritarian

Populism and the Rural World reflects on the rural origins and consequences of the emergence of authoritarian and populist leaders across the world as well as on the rise of multi class mobilisation and resistance alongside wider counter movements and alternative practices which together confront authoritarianism and nationalist populism The book includes 20 chapters written by contributors to the Emancipatory Rural Politics Initiative ERPI a global network of academics and activists committed to both reflective analysis and political engagement Debates about populism nationalism authoritarianism and more have exploded recently but relatively little of this has focused on the rural dimensions Yet wherever one looks the rural aspects are key not just in electoral calculus but in understanding underlying drivers of authoritarianism and populism and potential counter movements to these Whether because of land grabs voracious extractivism infrastructural neglect or lack of services rural peoples disillusionment with the status quo has had deeply troubling consequences and occasionally hopeful ones as the chapters in this book show The chapters in this book were originally published in The Journal of Peasant Studies

The Impact of Music on Human Development and Well-Being Michele Biasutti, Graham F. Welch, Jennifer MacRitchie, Gary E. McPherson, Evangelos Himonides, 2020-07-17 Music is one of the most universal ways of expression and communication in human life and is present in the everyday lives of people of all ages and from all cultures around the world Music represents an enjoyable activity in and of itself but its influence goes beyond simple amusement Listening to music singing playing composing and improvising individually and collectively are common activities for many people these activities not only allow the expression of personal inner states and feelings but also can bring many positive effects to those who engage in them There is an increasing wealth of literature concerning the wider benefits of musical activity and research in the sciences associated with music suggests that there are many dimensions of human life physical social psychological including cognitive and emotional which can be affected positively by music The impact that musical activity has on human life can be found in different processes including a transfer of learning from the musical to another cognitive domain Abilities that have been developed through music education and training may also be effectively applied in other cognitive tasks Engagement in successful music activity may also have a positive impact on social skills and social inclusion thus supporting the participation of the individual in collective and collaborative musical events The promotion of social participation through music can foster many kinds of inclusion including intercultural intergenerational and support for those who are differently abled The aim of this Research Topic is to present a diverse range of original articles that investigate and discuss in different ways the crucial role that musical activity can play in human development and well being

Time Domains of Hypoxia Adaptation: Evolutionary Insights and Applications Tatum S. Simonson, Francisco C. Villafuerte, 2021-12-22

Physiological and Pathological Responses to

Hypoxia and High Altitude Rodrigo Iturriaga, Rodrigo Del Rio, Jean-Paul R-Richalet, 2020-06-22 The appearance of photosynthetic organisms about 3 billion years ago increased the partial pressure of oxygen PO₂ in the atmosphere and enabled the evolution of organisms that use glucose and oxygen to produce ATP by oxidative phosphorylation Hypoxia is commonly defined as the reduced availability of oxygen in the tissues produced by different causes which include reduction of atmospheric PO₂ as in high altitude and secondary to pathological conditions such as sleep breathing and pulmonary disorders anemia and cardiovascular alterations leading to inadequate transport delivery and exchange of oxygen between capillaries and cells Nowadays it has been shown that hypoxia plays an important role in the genesis of several human pathologies including cardiovascular renal myocardial and cerebral diseases in fetal young and adult life Several mechanisms have evolved to maintain oxygen homeostasis Certainly all cells respond and adapt to hypoxia but only a few of them can detect hypoxia and initiate a cascade of signals intended to produce a functional systemic response In mammals oxygen detection mechanisms have been extensively studied in erythropoietin producing cells chromaffin cells bulbar and cortical neurons pulmonary neuroepithelial cells smooth muscle cells of pulmonary arteries and chemoreceptor cells While the precise mechanism underpinning oxygen sensing is not completely known several molecular entities have been proposed as possible oxygen sensors i e Hem proteins ion channels NADPH oxidase mitochondrial cytochrome oxidase Remarkably cellular adaptation to hypoxia is mediated by the master oxygen sensitive transcription factor hypoxia inducible factor 1 which can induce up regulation of different genes to cope the cellular effects related to a decrease in oxygen levels Short term responses to hypoxia included mainly chemoreceptor mediated reflex ventilatory and hemodynamic adaptations to manage the low oxygen concentration while more prolonged exposures to hypoxia can elicit more sustained physiological responses including switch from aerobic to anaerobic metabolism vascularization and enhancement of blood O₂ carrying capacity The focus of this research topic is to provide an up to date vision on the current knowledge on oxygen sensing mechanism physiological responses to acute or chronic hypoxia and cellular tissue organ adaptations to hypoxic environment

Viral World Long T. Bui, 2024-06-07 This book argues that the catastrophe of COVID 19 provided a momentous time for groups institutions and states to reassess their worldviews and relationship to the entire world Following multiple case studies across dozens of countries throughout the course of the pandemic this book is a timely contribution to cultural knowledge about the pandemic and the viral politics at the heart of it Mapping the various forms of global consciousness and connectivity engendered by the crisis the book offers the framework of viral worlding defined as viral forms of relationality becoming and communication It demonstrates how worlding or world making processes accelerated with the novel coronavirus New emergent forms of being global went viral to address conditions of inequality as well as forge possibilities for societal transformation Considering the tumult wrought by the pandemic Bui analyzes progressive movements for democracy abolition feminism environmentalism and socialism against the world shattering forces of capitalism

authoritarianism racism and militarism Focusing on ways the pandemic disproportionately impacted marginalized communities particularly in the Global South this book juxtaposes the closing of their lifeworlds and social worlds by hegemonic global actors with increased collective demands for freedom mobility and justice by vulnerable people The breadth and depth of the book thus provides students scholars and general readers with critical insights to understanding the world s of COVID 19 and collective efforts to build better new ones
