

SAFE MANUAL HANDLING

FOLLOW THIS QR CODE FOR LINKS TO MORE DETAILED GUIDELINES AND INFORMATION ON ANY RELEVANT PRODUCTS. The information in this poster is NOT a substitute for adequate training in Manual Handling within the workplace. All instructions provided are intended as general guidance only; the technique for lifting correctly will depend on numerous factors e.g. the shape, weight and size of the item.

175 480 175 480

1

ASSESS THE LOAD AND THE TASK

Manual Handling Regulations do not establish absolute limits on the maximum weights that can be lifted but do provide guidelines; these are 25kg for men and 16kg for women, when the load is at waist height.

Make sure that the weight is evenly distributed. Split the load into smaller and more manageable pieces if you need to, or make the load easier to grasp.

To make the lift easier you could push rather than pick up, reduce the carrying distance, ask someone to help you lift the load, or use a lifting aid.

2

PLAN THE ROUTE

Plan a route that is well lit and free from any slip or trip hazards. If the route is long, plan and provide opportunities for a rest along the way.

3

POSITION FEET

Place your feet apart with one leg slightly forward, then bend your knees (keeping your back and knees in their normal alignment). Do not stretch, twist or turn.

4

GET A GOOD GRIP

Hold the load firmly using both hands, ensuring that you have a secure grip so that the load cannot slip. Maintain a good posture while lifting.

5

LIFT CAREFULLY

Never try and lift more than you can safely manage. If at any point when you are lifting or carrying the load it becomes too heavy, carefully put it down.

At the start of the lift, a slight bending of the back, hips and knees are better than fully flexing the back or fully flexing the hips and knees (crouching).

While ensuring that your spine is kept in normal alignment, keep the load close to the waist with the heaviest side closest to the body.

Keep your head up and look ahead. Try to move smoothly, keeping the load still. Avoid turning and leaning sideways or backwards whilst carrying the load.

6

PUT IT DOWN

If the precise positioning of a load is needed, put it down first, then slide it into the desired position rather than twisting while putting the load down.
