Abstract—The purpose of this study was to determine the effect of a 10-week training program on the heart rate (HR) and heart rate reserve (HRR) of sedentary middle-aged men. The subjects were randomly assigned to a control group (CON) and an exercise group (EX). The EX group performed a 10-week training program consisting of three sessions per week. The HR and HRR were measured at rest and during submaximal and maximal exercise at baseline and after 10 weeks. The EX group showed a significant decrease in HR at rest and during submaximal and maximal exercise compared to the CON group. The HRR also showed a significant increase in the EX group compared to the CON group. The results of this study suggest that a 10-week training program can improve the cardiovascular fitness of sedentary middle-aged men.

If you are not satisfied with your results, follow the instructions carefully and test your original article. If the editor still requests the (a) paragraph and (b) and (c) paragraphs, repeat the analysis with the original data. The original data are available.

23. When configuring a multi-mount AFS, set `mountmnt` to your Netatun path: `mountmnt=/usr/bin/netatun`
24. If you're using the `afs` multi-mount method, add `afs` to the `mountmnt` path. For example, if you're using the `afs` multi-mount method, set `mountmnt` to `/usr/bin/netatun-afs`. This is required after the purchase of this type of multi-mount AFS, as pointing out the group appears in `group 1`.
25. Do not include the `FS` of `mountmnt`, as `FS` is deprecated.
26. When configuring the multi-mount AFS, the `afs` group should be added to the `netatun` user. Use the `netatun` group.

- Day and night periods that are longer than the standard 24 hours occur most commonly with the use of artificial light or other light sources. To avoid this, there are two things the producer should do:
 - Turn off the lights at the end of the work day.
 - Use red light for night shifts, as the wavelength of this light may be less disruptive to the circadian rhythm. Red light has the longest wavelength and the lowest energy, so it is least likely to affect the circadian rhythm. Some studies suggest that the 660 nm (red) light may be the best choice for night shifts.

When you install your T-Value One Connection, improper installation of all four screws (50 connections for One Connection®) will void the warranty. Please, confirm that:

- When a producer's price for the output rises or falls, it must adjust its output level accordingly. A rise in the price of the output will cause a producer to produce more output, and a fall in the price of the output will cause a producer to produce less output.

8. Using the information above, determine and fill in the table to the right. Consider the following: are the bonds attached to the carbons?
 - If the two are not attached, the number of bonds is one and the bond is independent on the other part of the bond.
9. Using the information above, determine and fill in the table to the right. Consider the following:
 - Do the two parts have different substituents attached to the shared bond or part in the table and are they Quaternary Tertiary Secondary or Primary?
10. Repeat the procedure above and determine if the other two carbons have the same or different substituents, how many substituents, and if they are the same or different.
11. Indicate if the two parts of the bond have the same or different substituents.
12. Repeat the entire procedure for the two carbons. Repeat the entire procedure until you have the right number of bonds for the two carbons.
