Multinationals, Global Value Chains and Governance Peter Hertenstein,2019-08-16 This book uses the examples of local supply firms in China and Brazil and their connections to the global automotive industry to explore the nature of current global value chains It argues that lead firms make use of product architecture to globalize their procurement and supply chain management and that they effectively restructure the global supply base by internationalizing the most capable supply firms thereby creating oligopolies controlled by the lead firm The book goes on to contend that some firms have gained such powerful positions that they have gained a degree of control over other firms without the necessity of ownership altering the mechanics of governance Also it shows how although some supply firms from emerging markets have utilized their business ties with western assembly firms to upgrade themselves within the global value chain most are squeezed out through increased global competition Overall the book makes a major new contribution to the economic theory of governance

Decoding China's Car Industry: 40 Years Anding Li,2021-12-02 This book is an authentic multidimensional history of the car industry in China 40 years attempts were made to change the status quo such as breaking the 220% tariff barrier and setting limits when opening up to international car companies It was not until the beginning of the 21st century that ordinary people in China started to own cars This led to rapid growth of the Chinese car industry since the 21st century However the industry is facing its biggest challenge due to conflict between China s economic and social values The author as a media person chronicling cars in China has witnessed experienced and even participated in the development process of the industry Weaving in juicy tales interesting details and rare pictures the readers are taken on an exhilarating ride through the story of cars in China
