New York City Housing Report:

NYC (New York City) Housing Partnership New York City Housing Partnership, United States. Department of Housing and Urban Development, 1985

A History of Housing in New York City Richard Plunz, 2016-10-18 Since its emergence in the mid nineteenth century as the nation's metropolis New York has faced the most challenging housing problems of any American city but it has also led the nation in innovation and reform The horrors of the tenement were perfected in New York at the same time that the very rich were building palaces along Fifth Avenue public housing for the poor originated in New York as did government subsidies for middle class housing A standard in the field since its publication in 1992 A History of Housing in New York City traces New York's housing development from 1850 to the present in text and profuse illustrations Richard Plunz explores the housing of all classes with comparative discussion of the development of types ranging from the single family house to the high rise apartment tower His analysis is placed within the context of the broader political and cultural development of New York City This revised edition extends the scope of the book into the city's recent history adding three decades to the study covering the recent housing bubble crisis the rebound and gentrification of the five boroughs and the ecological issues facing the next generation of New Yorkers More than 300 illustrations are integrated throughout the text depicting housing plans neighborhood changes and city architecture over the past 130 years This new edition also features a foreword by the distinguished urban historian Kenneth T Jackson

Inclusionary Housing and Urban Inequality in London and New York City Yuca Meubrink, 2024-09-10

Municipalities around the world have increasingly used inclusionary housing programs to address their housing shortages This book problematizes those programs in London and New York City by offering an empirical research based perspective on the socio spatial dimensions of inclusionary housing approaches in both cities The aim of those programs is to produce affordable housing and foster greater socio economic inclusion by mandating or incentivizing private developers to include affordable housing units within their market rate residential developments The starting point of this book is the so called poor door practice in London and New York City which results in mixed income developments with separate entrances for affordable housing and wealthier market rate residents Focusing on this poor door practice allowed for a critical look at the housing program behind it By exploring the relationship between inclusionary housing new build gentrification and austerity urbanism this book highlights the complexity of the planning process and the ambivalences and interdependencies of the actors involved Thereby it provides evidence that the provision of affordable housing or social mixing through this program has only limited success and above all that it promotes in a sense through the back door the very gentrification and displacement mechanisms it is supposed to counteract This book will be of interest to researchers and students of housing studies planning and urban sociology as well as planners and policymakers who are interested in the consequences of their own housing programs
