This space-egg houses all necessary items one could possibly need, bathroom, kitchen, lighting, a bed and several niches to store the stuff. The nose can be opened automatically and functions as a kind of porch.

BLOBV83

The design should make for the office of Sherrill Reynolds, an architect in his house, who was heavily inspired by his building experience.

With the existing site limitations and knowing these boundaries at the same time, Sherrill proceeded by designing a mobile unit, a blob.

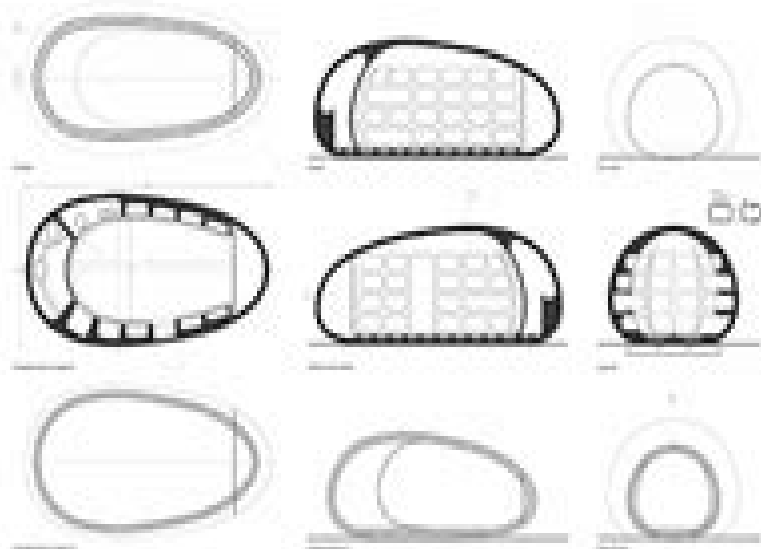

An a-frame construction and having a high floor of air, it formed round the shell building model.

BLOB, as a mobile, worked on levels as the ground, reaching in the small building gap.

Basically building a frame house covered up with a stretching material and painted with polycarbonate. Shaped by handling the polycarbonate and using epoxy resin, the space was built up with niches, typically 40cm. The space is between the water to water that was filled up with light insulation.

The space-egg houses all necessary items one could possibly need: bathroom, kitchen, lighting, stove and several niches to store the stuff. The nose can be opened automatically and functions as a kind of porch.

This mobile can naturally use as an office, a greenhouse, a workshop, a garden house, or any other space. The mobile unit is portable, easy to use for a big personal and family house to any place as needed.
