Office of the Auditor-General,2003 **Fiscal Reforms in the Middle East** Ehtisham Ahmad,Abdulrazaq Al Faris,2010-01-01 This insightful book focuses on the role of fiscal policy in common markets especially in the context of the supranational constructs in the Gulf Cooperation Council comprising Saudi Arabia Kuwait Bahrain Qatar the United Arab Emirates and Oman It draws on the experience of the EU and the importance of VAT and reflects on the other main common market in Central America Although oil windfalls have opened a window of opportunity for the Gulf States at the same time they have created numerous problems In particular the uncertainty associated with periods of boom and bust in the oil market has made the formulation and implementation of sound fiscal policies a formidable task In this study the distinguished authors present the background to current fiscal reforms and address the critical challenges facing the Gulf States including the choice between consumption and saving or current needs and future requirements intra generational equity issues the pro cyclicity of fiscal policy fiscal sustainability and the prudent management of revenues from finite oil reserves They examine the case for VAT to substantially replace customs duties a significant source of non oil revenue which would be lost as a result of free trade agreements between the GCC and key trading partners They also demonstrate how an agreed design for VAT would assist in furthering economic integration and enhance trade and exports If properly sequenced VAT would have a negligible impact on both inflation and the poor and would be progressive in relation to the customs duties replaced This highly topical book will be of great interest to academics specializing in public sector economics and public finance and to national and international policymakers involved in fiscal reform Georgia: Request for a Stand-By Arrangement-Press Release; Staff Report; and Statement by the Executive Director for Georgia International Monetary Fund. Middle East and Central Asia Dept.,2022-06-21 The authorities policy response aided a robust recovery from the COVID 19 shock in 2021 with output growth above expectations reflecting pent up demand and strong export performance However spillovers from the war in Ukraine are expected to dampen growth raise inflation and widen the current account deficit this year The recovery in 2021 and scaling back of pandemic measures led to a decline in the fiscal deficit and government debt Inflation is expected to remain higher for longer reflecting elevated global food and commodity prices The NBG has increased its policy rate by 3 percentage points since March 2021 *The Report: Indonesia 2015* Oxford Business Group,2015-05-21 With the application of the right policies Indonesia could return to growth above 6% and perhaps eventually reach the 7% target set by the new president The government intends to double expenditure in the key areas of public works transport and agriculture and new

plans include the construction of 2600 km of roads 15 airports 24 ports 3258 km of railway and the addition of around 35 000 MW to the state electricity company s current capacity The investments to be made in infrastructure have the potential to boost the economy in both the short and long term A shift to more investment and less consumption would help lead to more sustainable growth and insulate the country from external shocks Already the numbers are starting to head in the right direction Second report of session 2012-13 Great Britain: Parliament: House of Commons: European Scrutiny Committee,2012-05-29 The International Guide to Tax Auditing R. they haven't had a way to implement product teams within the rigid constraints of traditional organizational structures. The Investment planning approach described in this book supports small development increments planned and developed by product teams aligned by common schedule and financial goals. It uses Cost of Delay principles to prioritize work with the highest value and shortest cycle times. Investments provide a vehicle for collaboration and innovation and fulfill the promise of highly motivated self-directed Agile development teams. This book is for engineers, product managers, and project managers who want to finally do Agile the way it was envisioned. This book is also for leaders who want to build high performance teams around the inherent motivational environment of Agile when done right.
