Getting to Zero Sinead Walsh, Oliver Johnson, 2018-07-15 In 2014 a 28 year old British doctor found himself co-running the Ebola isolation unit in Sierra Leone's main hospital after the doctor in charge had been killed by the virus Completely overwhelmed and wrapped in stifling protective suits he and his team took it in turns to provide care to patients while removing dead bodies from the ward

Against all odds he battled to keep the hospital open as the queue of sick and dying patients grew every day Only a few miles down the road the Irish Ambassador and Head of Irish Aid worked relentlessly to rapidly scale up the international response At a time when entire districts had been quarantined she travelled around the country and met with UN agencies the President and senior ministers so as to be better placed in alerting the world to the catastrophe unfolding in front of her In this blow by blow account Walsh and Johnson expose the often shocking shortcomings of the humanitarian response to the outbreak both locally and internationally and call our attention to the immense courage of those who put their lives on the line every day to contain the disease Theirs is the definitive account of the fight against an epidemic that shook the world

The Transformation of Citizenship, Volume 1 Juergen Mackert, Bryan S. Turner, 2017-03-16 The Transformation of Citizenship addresses the basic question of how we can make sense of citizenship in the twenty first century These volumes make a strong plea for a reorientation of the sociology of citizenship and address serious threats of an ongoing erosion of citizenship rights Arguing from different scientific perspectives rather than offering new conceptions of citizenship as supposedly more adequate models of rights membership and belonging they deal with both the ways citizenship is transformed and the ways it operates in the face of fundamentally transformed conditions This volume Political Economy discusses manifold consequences of a decades long enforcement of neo liberalism for the rights of citizens As neo liberalism not only means a new form of economic system it has to be conceived of as an entirely new form of global regional and national governance that radically transforms economic political and social relations in society Its consequences for citizenship as a social institution are no less than dramatic Against the background of both manifest and ideological processes the book looks at if citizenship has lost the basis it has rested upon for decades or if the institution itself is in a process of being fundamentally transformed and restructured thereby changing its meaning and the significance of citizens rights This book will appeal to academics working in the field of political theory political sociology and European studies

Miseducating for the Global Economy Gerald Coles, 2018-06-26 Reveals that behind the going concern for global economy education lies capitalism's indifference to human values to a fair distribution of resources to its radical restructuring of workplaces with an attendant intensification of work effort and to the genuine well being of workers and their families Coles provides a real education about the twenty first century global economy and what corporations are doing to prevent our learning about it He describes the intellectually narrow and morally crippling effects of the corporate control of education how the imperative for profit maximizes the misunderstanding of communities nations and the environment even as it minimizes aesthetic appreciation cultural expression compassion itself But it is by understanding all this Coles argues that real change can begin Adapted from publisher description

You're Paid What You're Worth Jake Rosenfeld, 2021-02-16 This is the book to throw at your human resources director not literally of course when any attempt is being made to bamboozle you about how decisions on pay have been made It is a closely argued thoroughly researched treatise on how we got here and how pay could be both fairer and more effective as a reward Stefan Stern Financial World A flat out revelation of a book by one of the nation's top scholars of the labor market required reading for anyone who cares about the future of work in America Matthew Desmond author of *Poverty* by America Jake Rosenfeld pulls back the curtain on the multifaceted cultural institutional and market forces at play in wage setting This timely book illuminates the power dynamics and often arbitrary forces that have contributed to the egregious inequality in the U S labor market and then lays out a clear blueprint for progressive change Thea Lee President of the Economic Policy Institute Job performance and where you work play a role in determining pay but judgments of productivity and value are highly subjective What makes a lawyer more valuable than a teacher How do you measure the output of a police officer a professor or a reporter Why in the past few decades did CEOs suddenly become hundreds of times more valuable than their employees The answers lie not in objective criteria but in battles over interests and ideals Four dynamics are paramount power inertia

mimicry and demands for equity Power struggles legitimize pay for particular jobs and organizational inertia makes that pay seem natural Mimicry encourages employers to do what their peers are doing And workers are on the lookout for practices that seem unfair Jake Rosenfeld shows us how these dynamics play out in real world settings drawing on cutting edge economics and original survey data with an eye for compelling stories and revealing details You re Paid What You re Worth gets to the heart of that most basic of social questions Who gets what and why *Suffer the Children* Gary Scott Smith, Jane Marie Smith, 2017-01-31 We all say that we care about children We all know that millions of children around the world including in the United States are suffering physically materially and emotionally and are unable to reach their full potential Moreover their material deprivation and physical ills often prevent them from responding to the gospel Most of us conclude that we cannot do anything significant to help the impoverished children living in our own backyards let alone those living in the slums of Nairobi or the hinterlands of Haiti We can however do much to improve their lives materially and spiritually Through praying giving generously sponsoring children volunteering with aid organizations living more simply investing and shopping more prudently and advocating more zealously in the political arena we can make a difference We can prod politicians business executives and church leaders to prioritize aiding destitute children We can support one of the hundreds of organizations that are working effectively to help indigent children have better lives *Suffer the Children* describes the plight of poor children and provides many practical ways we can participate in one of the most important crusades to improve our world *Parcels* Mike Anastario, 2019-05-03 In light of new proposals to control undocumented migrants in the United States *Parcels* prioritizes rural Salvadoran remembering in an effort to combat the collective amnesia that supports the logic of these historically myopic strategies Mike Anastario investigates the social memories of individuals from a town he refers to as El Norte o a rural municipality in El Salvador that was heavily impacted by the Salvadoran Civil War which in turn fueled a mass exodus to the United States By working with two viajeros travelers who exchanged encomiendas parcels containing food medicine documents photographs and letters between those in the U S and El Salvador Anastario tells the story behind parcels and illuminates their larger cultural and structural significance This narrative approach elucidates key arguments concerning the ways in which social memory permits and is shaped by structural violence particularly the U S actions and policies that have resulted in the emotional and physical distress of so many Salvadorans The book uses analyses of testimonies statistics memories of migration the war and of course the many parcels sent over the border to create an innovative and necessary account of post Civil War El Salvador *The Postcolonial Contemporary* Jini Kim Watson, Gary Wilder, 2018-07-03 This volume invokes the postcolonial contemporary in order to recognize and reflect upon the emphatically postcolonial character of the contemporary conjuncture as well as to inquire into whether postcolonial criticism can adequately grasp it Neither simply for nor against postcolonialism the volume seeks to cut across this false alternative and to think with postcolonial theory about political contemporaneity Many of the most influential frameworks of postcolonial

theory were developed during the 1970s and 1990s during what we may now recognize as the twilight of the postwar period. If forms of capitalist imperialism are entering into new configurations of neoliberal privatization wars without end, xenophobic nationalism and unsustainable extraction, what aspects of postcolonial inquiry must be reworked or revised in order to grasp our political present? In twelve essays that draw from a number of disciplines—history, anthropology, literature, geography, indigenous studies, and regional locations—the *Black Atlantic*, *South Africa*, *South Asia*, *East Asia*, *Australia*, *Argentina*. The *Postcolonial Contemporary* seeks to move beyond the habitual oppositions that have often characterized the field, such as universal vs. particular, Marxism vs. postcolonialism, and politics vs. culture. These essays signal an attempt to reckon with new and persisting postcolonial predicaments and do so under four interrelated analytics: *Postcolonial Temporality*, *Deprovincializing the Global South*, *Beyond Marxism versus Postcolonial Studies*, and *Postcolonial Spatiality and New Political Imaginaries*.

Tracing the Contours of Official Economic Statistics in India Arjun Kumar, Anshula Mehta, Ritika Gupta, Simi Mehta, 2021-09-17. The system of official economic statistics in India has undergone myriad changes since Independence. There have been various developments in its administrative structures and changing levels of focus on different economic sectors. The types of datasets available for these sectors have been ever evolving and undergo dynamic changes owing to real-time measurement and analysis using ICT. The Agricultural and Livestock Censuses capture data on the agricultural sector. For the Industries sector, Annual Survey of Industries and the Directorate of Industries in states are the two major sources of data. Since economic liberalisation in India, there has been an increased focus on the Services sector and developing a well-organised mechanism to cover it. This sector is covered by National Sample Surveys, Ministry of Corporate Affairs, MCA 21 Database, GSTN, and others. The unorganised and informal sectors of the economy also find coverage in NSS Rounds on Employment and Enterprises. The Census of India, the Economic Census, Price Indices, and NSS Rounds on Consumption Expenditure, Enterprises, and Employment among others are major sources of economic statistics as well. We also have new arrays of data for the formal sector in the form of EPFO, Direct Tax, Property Tax, and others. Using this sector-wise classification of Agriculture, Industries, and Services, and also including the unorganised and informal sectors, the paper explores India's structure of economic statistics. While the paper draws attention to recent datasets and rounds of surveys, the focus is also on the evolution of the system of official economic statistics in India. The paper highlights issues with the credibility and utility of the available data in light of a declining GDP growth, which also gives rise to more serious questions on the reliability of the country's data architecture and system of economic statistics. It also discusses structural changes such as those of the MoSPI and NSC. The system of official economic statistics in India now faces the challenge of adapting to Information and Communication Technology. The paper thus emphasises the role of strengthening real-time and Management Information Systems data to enable evidence-based policymaking and planning and realise the vision of New India and a US \$5 trillion economy.
