and its complex intersection with international law has led many jurisdictions to develop environmental courts or tribunals. Strikingly the list of jurisdictions that have chosen to do this include numerous developing countries including Bangladesh, Kenya and Malawi. Indeed it seems that developing nations have taken the task of capacity building in environmental law more seriously than many developed nations. Environmental Justice in India explores the genesis, operation and effectiveness of the Indian National Green Tribunal (NGT). The book has four key objectives: First to examine the importance of access to justice in environmental matters promoting sustainability and good governance; Second to provide an analytical and critical account of the judicial structures that offer access to environmental justice in India; Third to analyse the establishment, working practice and effectiveness of the NGT in advancing a distinctively Indian green jurisprudence; Finally to present and review the success and external challenges faced and overcome by the NGT resulting in growing usage and public respect for the NGT's commitment to environmental protection and the welfare of the most affected people. Providing an informative analysis of a growing judicial development in India, this book will be of great interest to students and scholars of environmental justice, environmental law, development studies and sustainable development.

Regulating Risks in the European Union Maria Weimer, Anniek de Ruijter, 2017-10-05. A growing body of EU law and regulation is preoccupied with the protection of EU citizens from health and environmental risks. Which chemicals are safe and should be allowed on the market? How should the EU respond to public health emergencies such as Ebola and other infectious diseases? Regulatory responses to these questions confront deep uncertainty, limited knowledge and societal contestation. In a time where the use of scientific expertise in EU policy making is particularly contested, this book offers a timely contribution to both the academic and policy debate on the role of specialised expertise in EU public decision making on risk and technology as well as on its intertwinement with executive power. It draws on insights from law, governance, political sciences and science and technology studies, bringing together leading scholars in this field. Contributions are drawn together by a shared theoretical perspective, namely by their use of co-production as an analytical lens to study the intricate interplay between technological scientific expertise and EU executive power. By so doing, this collection produces highly original insights into the development of the EU administrative state as well as into the role of regulatory science in its construction. This book will be useful to scholars, practitioners and policy makers working on risk regulation and the role of expertise in public decision making.

The Rise of Critical Islam Youcef L. Soufi, 2023 In a richly narrated historical study Youcef Soufi excavates an Islamic legal culture of critique from the 10th to 13th centuries Focusing on the practice of *mun ara* disputation Soufi explores how and why oral debates became a pervasive and revered part of the intellectual legal landscape of Iraq and Persia Using the life and career of celebrated Iraqi jurist Ab Is q al Sh r z he traces the formalization of debate gatherings at the dawn of the classical legal schools *al madh hib* in the early 10th century and analyzes the wider institutional social and discursive conditions that made debate an important feature of any jurist's practice Pushing back against claims that classical Muslim jurists sought to weed out differences of opinion The Rise of Critical Islam presents a community committed to the openness fluidity and continued exploration of the law Challenging the view of debate gatherings simply as mechanisms of doctrinal resolution before codification the study reveals a classical culture where critical debates were part of a continual and personal quest to discover God's law In uncovering this classical legal culture Soufi invites readers to question claims about the promise of secular critique in disciplining religious passions and forging human solidarity

The Morality Wars Louise Mabile, Henk Stoker, 2021-07-13 In *The Morality Wars* contributors from religious and non religious backgrounds debate the origin and nature of human goodness While the subject is often addressed by prominent figures on both sides of the believer atheist divide on public platforms and social media participants seldom get the opportunity to explain their viewpoints in depth In addition to engaging the traditional conflict between science and religious faith over the content and nature of the moral conscience the contributors also draw on and engage with figures who are often neglected when committed theologians and atheists debate each other such as Sigmund Freud Friedrich Nietzsche David Hume Jean

Jacques Rousseau and Jacques Lacan **Unifying the Nation** Joseph F. Zimmerman, 2015-01-27 In depth examination of a rarely studied article of the United States Constitution While there is a vast amount of scholarship on the US Constitution very little of it addresses Article IV The article s first section the Full Faith and Credit Clause requires that individual states must respect the public acts accords and judicial proceedings of every other state and the second section the Privileges and Immunity Clause prevents one state from treating the citizens of another state in a discriminatory manner In Unifying the Nation Joseph F Zimmerman provides a unique and comprehensive examination of court cases pertaining to both sections Article IV he argues is central to the political and economic union of the individual states that comprise the nation Many of the court cases cited in the text have tremendous day to day relevance and implications for the practice of government such as same sex marriage child adoption child support public welfare health care and telecommunications **Popular**
