When the Seas Rise Heather Dewar,University of Florida,2016-05-18 University of Florida has an ambitious goal to harness the power of its faculty staff students and alumni to solve some of society's most pressing problems and to become a resource for the state of Florida the nation and the world Sea levels are rising around the globe and in Florida with its 1 200 miles of coastline and mostly flat topography this is of particular concern The state depends on coastal cities where 75 percent of the population lives and where more than four fifths of its economic activity takes place When economists tally up the likely costs of rising seas they rank Florida as the most vulnerable state in the nation and Miami as one of the most vulnerable major cities in the world When the Seas Rise takes us on an alarming journey from the dying coastal forests where salt killed tree trunks stand like sentinels of a retreating army to the high tide flooded streets of cities from St Augustine to Key West Meet the scientists at the University of Florida researchers in biology geology entomology horticulture urban and regional planning as well as other fields who along with other experts around the state are planning for the sea change already upon us and the greater changes to come They are working around the clock to predict how global climate shifts will affect the state to protect drinking water and slow the effects of flooding to develop new ways to farm to save our butterflies sea turtles Key deer and other endangered creatures to preserve the state's economy and to help coastal dwellers plan future havens for the people and wildlife of Florida The stories chronicled in GATORBYTES span all colleges and units across the UF campus They detail the far reaching impact of UF's research technologies and innovations and the UF faculty members dedicated to them Gatorbytes describe how UF is continuing to build on its strengths and extend the reach of its efforts so that it can help even more people in even more places

EU Legal Acts Marise Cremona,Claire Kilpatrick,2018-02-08 In this collection of essays originally presented at the Academy of European Law in Florence the changing landscape of the EU's legal acts is explored Further to this the changing boundaries between legal acts and processes which may create norms but do not create law in the traditional sense are analysed This landscape is presented in two ways Firstly by focusing on the transformations and challenges to the EU's traditional legal acts in particular since the reconfiguration of the categories of legal acts and the procedures for which they are adopted by the Lisbon Treaty Secondly the collection focuses on those acts found at or beyond the margin of classic EU

legal acts including acts of Member States such as inter se treaties self regulation and collective agreements so called soft law and decision making outside the normal legislative procedures The volume endeavours to explain the adaptability of the EU legal order despite the fact that the legal instruments at the Union s disposal have not fundamentally changed since the Treaty of Rome came into force 60 years ago It explores the challenges that new decisional procedures and variations in the legal quality of EU acts pose for the EU s legal order including alterations to institutional balance and the roles of the different institutional actors and challenges to the rule of law
