Multi-Sensor Imaging and Fusion: Methods, Evaluations, and Applications, volume III Zhiqin Zhu,Yu

Liu,Huafeng Li,Jinxing Li ,Bo Xiao,2025-11-06 Multi sensor image fusion focuses on processing images of the same object or scene acquired by multiple sensors in which various sensors with multi level and multi spatial information are complemented and combined to ultimately yield a consistent interpretation of the observed environment In recent years multi sensor image fusion has become a highly active topic and various fusion methods have been proposed Many effective processing methods including multi scale transformation fuzzy inference and deep learning have been introduced to design fusion algorithms Despite the great progress there are still some noteworthy challenges in the field such as the lack of unified fusion theories and methods for effective generalized fusion the lack of fault tolerance and robustness the lack of benchmarks for performance evaluation the lack of work on specific applications of multi sensor image fusion and so on This Research Topic focuses on reporting advanced studies related to multi sensor image fusion including methods evaluations and applications aiming to promote the development of multi sensor image fusion techniques and applied it to medical image segmentation biology analysis and astronomy imaging More specifically this special issue expects high quality work such as unified fusion theories and effective generalized fusion methods effective performance evaluation methods for multi sensor image fusion and practical applications of multi sensor image fusion in classification detection and segmentation tasks Multi sensor fusion methods can be developed based on traditional processing methods or deep learning methods For performance evaluations benchmarks involving datasets objective metrics and baseline creation methods are welcome to be investigated In addition specific applications are also welcome to be studied such as the fusion of images from different modalities using multi sensor fusion techniques Multi sensor image registration Multi sensor image fusion High dynamic range imaging Multi sensor modality object detection and segmentation Machine learning deep learning for multi sensor image processing Multi sensor image fusion datasets and benchmarks Objective evaluation of multi sensor image fusion Multi sensor image fusion in different fields Multi sensor information monitoring and detection Multi sensor information processing Multi source natural Language and Image Fusion Processing **Soviet Physics** ,1984 **Document Analysis and Recognition - ICDAR**
