

Advanced Subsidiary GCE Biology

Unit F212 Molecules, Biodiversity, Food and Health - High banded Candidate style answer

OCR has produced these candidate style answers to support teachers in interpreting the assessment criteria for the new GCE specifications and to bridge the gap between new specification release and availability of exemplar candidate work.

This content has been produced by senior OCR examiners, with the input of Chairs of Examiners, to illustrate how the sample assessment questions might be answered and provide some commentary on what factors contribute to an overall grading. The candidate style answers are not written in a way that is intended to replicate student work but to demonstrate what a "good" or "excellent" response might include, supported by examiner commentary and conclusions.

As these responses have not been through full moderation and do not replicate student work, they have not been graded and are instead, banded "medium" or "high" to give an indication of the level of each response.

Please note that this resource is provided for advice and guidance only and does not in any way constitute an indication of grade boundaries or endorsed answers.

- 1 Some species of Acacia tree produce gum Arabic. Gum arabic is classed as a heteropolysaccharide. This means that it is made up of a number of different sugars.**

- (a) Describe what happens during the hydrolysis of a polysaccharide molecule. [2]**

Candidate style answer

When a polysaccharide is hydrolysed, water is added to break the bonds between the monosaccharides.

Examiner's commentary

This is a response that indicates understanding of hydrolysis and addresses the question.

- (b) Complete the table below, comparing gum arabic with some other polysaccharides. [4]**

Candidate style answer

	gum arabic	amylose	cellulose	glycogen
branched structure	yes	no	no	yes
heteropoly saccharide	yes	no	no	no
found in animals / plants	plants	plants	plants	animal
function in organism	healing cuts	store of energy	cell wall	energy store

Examiner's commentary

This is a well thought out answer that gives sufficient detail when required.
