SOME INVESTIGATIONS ON STEGANOGRAPHY TECHNIQUES Dr. V. Nagaraj, 2021-05-20 Steganography is the art of hiding and transmitting data through apparently innocuous carriers in an effort to conceal the existence of the secret data. The Least Significant Bit (LSB) steganography, which replaces the least significant bits of the host medium, is a widely used technique with low computational complexity and high insertion capacity. Although it has good perceptual transparency, it is vulnerable to steganalysis, which is based on statistical analysis. Many other steganography algorithms have been developed, such as Discrete Cosine Transform (DCT), Discrete Wavelet Transform (DWT), and Spread Spectrum Embedding. But the insertion capacities for all the above methods were not satisfied. Therefore, developing new steganography algorithms against statistical analysis seems to be the prime requirement in steganography. The LSB insertion method is the most common and easiest method for embedding messages in an image with high capacity. However, it is detectable by statistical analysis, such as RS and Chi-square analysis. Hence, researchers are still looking out for steganography techniques with enhanced insertion capacity of secret data along with greater security and which can resist attacks. In this work, in order to enhance the embedding capacity of secret data, four techniques for secret communication have been proposed. They are classified into two categories. In the first category, cryptography is used along with steganography to enhance the security, while in the second category, only steganography is used. In the first category, two improved LSB substitution techniques have been proposed. The first technique is known as Zigzag Modulo Substitution Method, in which embedding locations are sequence based. The second technique is known as Random Modulo Substitution Method, using a random technique in LSB steganography and a user key-based LSB substitution steganography for RGB images, where the RSA algorithm is used for encryption. The techniques under the first category are exclusively LSB array based. The first LSB array based technique embeds message bits into LSB arrays of the cover image by using zigzag scanning. On the other hand, the Random Modulo Substitution Method embeds secret data into the different locations of the cover image by using a pseudo-random index generator. Moreover, both these LSB array based techniques use the RSA algorithm to enhance security. Histogram and statistical analysis performed on the stego image proved that the proposed techniques can effectively resist steganalysis. Comparison of the statistical parameters like Root Mean Square (RMS), Peak Signal to Noise Ratio (PSNR), and Structural Similarity Index Matrix (SSIM) for the proposed techniques with the cover image and stego image was carried out and analyzed. The second category includes pixel value modification method and pixel value differencing method, in which the embedding decision for a target pixel is taken by a random technique. Data hiding by using pixel value modification with modulus function in color images guarantees that no pixel value will exceed the range 0 to 255 in the stego image. In the existing PVD embedding methods, only one secret digit was embedded for two consecutive pixels, but the proposed method embeds one secret digit in only one pixel. The proposed method on color images gives more capacity and security than the PVD methods. It also provides better visual quality of the stego image. Moreover, the proposed

method extracts the hidden secret message efficiently without using the range tables In existing steganography algorithms like Pixel Value Differencing PVD methods the secret data are embedded into the differences of adjacent pixels This pair wise modification mechanism in cover image increases the histogram distortion

Quantitative analysis of neuroanatomy

Julian M L Budd,Hermann Cuntz,Stephen J Egle,Patrik Krieger,2016-03-22 The true revolution in the age of digital neuroanatomy is the ability to extensively quantify anatomical structures and thus investigate structure function relationships in great detail Large scale projects were recently launched with the aim of providing infrastructure for brain simulations These projects will increase the need for a precise understanding of brain structure e g through statistical analysis and models From articles in this Research Topic we identify three main themes that clearly illustrate how new quantitative approaches are helping advance our understanding of neural structure and function First new approaches to reconstruct neurons and circuits from empirical data are aiding neuroanatomical mapping Second methods are introduced to improve understanding of the underlying principles of organization Third by combining existing knowledge from lower levels of organization models can be used to make testable predictions about a higher level organization where knowledge is absent or poor This latter approach is useful for examining statistical properties of specific network connectivity when current experimental methods have not yet been able to fully reconstruct whole circuits of more than a few hundred neurons

Applications of Mathematics in Science and Technology Bui Thanh Hung,M. Sekar,Ayhan ESI,R. Senthil

Kumar,2025-04-29 The Conference dealt with one of the most important problems faced in International development in Pure Mathematics and Applied mathematics development in engineering such as Cryptography Cyber Security Network Operations Research Heat Equation and so forth The aim of the conference was to provide a platform for researchers engineers academicians as well as industrial professionals to present their research results and development activities in Pure and Apply Mathematics and its applied technology It provided opportunities for the delegates to exchange new ideas and application experiences to establish business or research relations and to find global partners for future collaboration

Educating for the 21st Century Suzanne Choo,Deb Sawch,Alison Villanueva,Ruth Vinz,2016-10-20 All over the world governments policymakers and educators are advocating the need to educate students for the 21st first century This book provides insights into what this means and the ways 21st century education is theorized and implemented in practice The first part Perspectives Mapping our futures in the making uncovers the contradictions tensions and processes that shape 21st century education discourses The second part Policies Constructing the future through policymaking discusses how 21st century education is translated into policies and the resulting tensions that emerge from top down state sanctioned policies and bottom up initiatives The third part Practices Enacting the Future in Local Contexts discusses on the ground initiatives that schools in various countries around the world enact to educate their students for the 21st century This volume includes contributions from leading scholars in the field as well as educators from schools and those working with schools

Advances in Neural Networks - ISNN 2014 Zhigang Zeng, Yangmin Li, Irwin King, 2014-11-28 The volume LNCS 8866 constitutes the refereed proceedings of the 11th International Symposium on Neural Networks ISNN 2014 held in Hong Kong and Macao China on November December 2014 The 71 revised full papers presented were carefully reviewed and selected from 119 submissions These papers cover all major topics of the theoretical research empirical study and applications of neural networks research as follows The focus is on following topics such as analysis modeling and applications

Color Vision Sensation and Perception Marcelo Fernandes Costa, 2016-09-15 Color vision is considered a microcosm of the visual science Special physiological and psychological processes make this scientific topic an intriguing and complex research field that can aggregate around molecular biologists neurophysiologists physicists psychophysicists and cognitive neuroscientists Our purpose is to present the frontier knowledge of this area of visual science showing in the end the future prospects of application and basic studies of color perception

Communication and Computing Systems B.M.K. Prasad, Krishna Kant Singh, Neelam Ruhil, Karan Singh, Richard O'Kennedy, 2017-02-15 This book is a collection of accepted papers that were presented at the International Conference on Communication and Computing Systems ICCCS 2016 Dronacharya College of Engineering Gurgaon September 9 11 2016 The purpose of the conference was to provide a platform for interaction between scientists from industry academia and other areas of society to discuss the current advancements in the field of communication and computing systems The papers submitted to the proceedings were peer reviewed by 2 3 expert referees This volume contains 5 main subject areas 1 Signal and Image Processing 2 Communication Computer Networks 3 Soft Computing Intelligent System Machine Vision and Artificial Neural Network 4 VLSI Embedded System 5 Software Engineering and Emerging Technologies

Computer Vision - ACCV 2014 Workshops C.V. Jawahar, Shiguang Shan, 2015-04-10 The three volume set consisting of LNCS 9008 9009 and 9010 contains carefully reviewed and selected papers presented at 15 workshops held in conjunction with the 12th Asian Conference on Computer Vision ACCV 2014 in Singapore in November 2014 The 153 full papers presented were selected from numerous submissions LNCS 9008 contains the papers selected for the Workshop on Human Gait and Action Analysis in the Wild the Second International Workshop on Big Data in 3D Computer Vision the Workshop on Deep Learning on Visual Data the Workshop on Scene Understanding for Autonomous Systems and the Workshop on Robust Local Descriptors for Computer Vision LNCS 9009 contains the papers selected for the Workshop on Emerging Topics on Image Restoration and Enhancement the First International Workshop on Robust Reading the Second Workshop on User Centred Computer Vision the International Workshop on Video Segmentation in Computer Vision the Workshop My Car Has Eyes Intelligent Vehicle with Vision Technology the Third Workshop on E Heritage and the Workshop on Computer Vision for Affective Computing LNCS 9010 contains the papers selected for the Workshop on Feature and Similarity for Computer Vision the Third International Workshop on Intelligent Mobile and Egocentric Vision and the Workshop on Human Identification for Surveillance

Computer Vision -- ACCV 2014 Daniel Cremers, Ian Reid, Hideo Saito, Ming-Hsuan Yang, 2015-04-16 The five volume set LNCS 9003 9007 constitutes the thoroughly refereed post conference proceedings of the 12th Asian Conference on Computer Vision ACCV 2014 held in Singapore Singapore in November 2014 The total of 227 contributions presented in these volumes was carefully reviewed and selected from 814 submissions The papers are organized in topical sections on recognition 3D vision low level vision and features segmentation face and gesture tracking stereo physics video and events and poster sessions 1 3

Social Media News Umang Marar, 2025-01-03 Social Media News Trends and Influence explores the growing role of social media as a major source of information We emphasize the importance of accurate relevant and timely statistics for informed decision making at local national and global levels Our book is designed to help budding journalists master the finer nuances of media writing Social media s unique nature and diverse platforms present challenges in understanding its psychological impact We include a collection of recent studies that focus on the effects of social media news and the framing of social issues Authors of these studies used surveys experiments and content analysis to explore their research questions Each chapter provides valuable insights into the evolving impact of social media information

Informatics, Networking and Intelligent Computing Jiaying Zhang, 2015-05-06 This proceedings volume contains selected papers presented at the 2014 International Conference on Informatics Networking and Intelligent Computing held in Shenzhen China Contributions cover the latest developments and advances in the field of Informatics Networking and Intelligent Computing

Machine Learning Techniques Applied to Geoscience Information System and Remote Sensing Hyung-Sup Jung, Saro Lee, 2019-09-03 As computer and space technologies have been developed geoscience information systems GIS and remote sensing RS technologies which deal with the geospatial information have been rapidly maturing Moreover over the last few decades machine learning techniques including artificial neural network ANN deep learning decision tree and support vector machine SVM have been successfully applied to geospatial science and engineering research fields The machine learning techniques have been widely applied to GIS and RS research fields and have recently produced valuable results in the areas of geoscience environment natural hazards and natural resources This book is a collection representing novel contributions detailing machine learning techniques as applied to geoscience information systems and remote sensing

Emerging Technology in Modelling and Graphics Jyotsna Kumar Mandal, Debika Bhattacharya, 2019-07-16 The book covers cutting edge and advanced research in modelling and graphics Gathering high quality papers presented at the First International Conference on Emerging Technology in Modelling and Graphics held from 6 to 8 September 2018 in Kolkata India it addresses topics including image processing and analysis image segmentation digital geometry for computer imaging image and security biometrics video processing medical imaging and virtual and augmented reality

Advanced Concepts for Intelligent Vision Systems Jacques Blanc-Talon, David Helbert, Wilfried Philips, Dan Popescu, Paul Scheunders, 2018-09-24 This book constitutes the refereed proceedings of the 19th International Conference on Advanced Concepts for Intelligent

Vision Systems ACIVS 2018 held in Poitiers France in September 2018 The 52 full papers presented in this volume were carefully reviewed and selected from 91 submissions They were organized in topical sections named video analysis segmentation and classification remote sensing biometrics deep learning coding and compression and image restoration and reconstruction

Cyber Security and Computer Science Touhid Bhuiyan,Md. Mostafijur Rahman,Md. Asraf Ali,2020-07-29 This book constitutes the refereed post conference proceedings of the Second International Conference on Cyber Security and Computer Science ICONCS 2020 held in Dhaka Bangladesh in February 2020 The 58 full papers were carefully reviewed and selected from 133 submissions The papers detail new ideas inventions and application experiences to cyber security systems They are organized in topical sections on optimization problems image steganography and risk analysis on web applications machine learning in disease diagnosis and monitoring computer vision and image processing in health care text and speech processing machine learning in health care blockchain applications computer vision and image processing in health care malware analysis computer vision future technology applications computer networks machine learning on imbalanced data computer security Bangla language processing

Neural Information Processing Tom Gedeon,Kok Wai Wong,Minho Lee,2019-12-10 The three volume set of LNCS 11953 11954 and 11955 constitutes the proceedings of the 26th International Conference on Neural Information Processing ICONIP 2019 held in Sydney Australia in December 2019 The 173 full papers presented were carefully reviewed and selected from 645 submissions The papers address the emerging topics of theoretical research empirical studies and applications of neural information processing techniques across different domains The second volume LNCS 11954 is organized in topical sections on image processing by neural techniques learning from incomplete data model compression and optimisation neural learning models neural network applications and social network computing

Multiscale, Nonlinear and Adaptive Approximation II Ronald DeVore,Angela Kunoth,2024-12-03 This book presents a collection of high quality papers in applied and numerical mathematics as well as approximation theory all closely related to Wolfgang Dahmen s scientific contributions Compiled in honor of his 75th birthday the papers are written by leading experts and cover topics including nonlinear approximation theory numerical analysis of partial differential equations learning theory and electron microscopy A unifying theme throughout the collection is the emphasis on a solid mathematical foundation which serves as the basis for the most efficient numerical algorithms used to simulate complex phenomena

Unearthing Fossils Tamra B. Orr,2014-01-01 The ability to use the NextGen science process is key to carrying out experiments taking measurements or performing technical tasks In this book readers in real world situations are tasked with following clues and using the NextGen science process to find out about unearthing fossils Informational text presents evidence and facts in the form of clues and side bar details to help children develop critical thinking skills A summary of the situation is included to show how each chapter contributes to the whole and for a solid understanding of the topic

Modeling, Dynamics, Optimization and Bioeconomics II Alberto A. Pinto,David

Zilberman,2017-09-30 The concepts and techniques presented in this volume originated from the fields of dynamics statistics control theory computer science and informatics and are applied to novel and innovative real world applications Over the past few decades the use of dynamic systems control theory computing data mining machine learning and simulation has gained the attention of numerous researchers from all over the world Admirable scientific projects using both model free and model based methods coevolved at today s research centers and are introduced in conferences around the world yielding new scientific advances and helping to solve important real world problems One important area of progress is the bioeconomy where advances in the life sciences are used to produce new products in a sustainable and clean manner In this book scientists from all over the world share their latest insights and important findings in the field The majority of the contributed papers for this volume were written by participants of the 3rd International Conference on Dynamics Games and Science DGSIII held at the University of Porto in February 2014 and at the Berkeley Bioeconomy Conference at the University of California at Berkeley in March 2014 The aim of the project of this book Modeling Dynamics Optimization and Bioeconomics II follows the same aim as its companion piece Modeling Dynamics Optimization and Bioeconomics I namely the exploration of emerging and cutting edge theories and methods for modeling optimization dynamics and bioeconomy

Mathematics for Machine Learning Marc Peter Deisenroth,A. Aldo Faisal,Cheng Soon Ong,2020-04-23 The fundamental mathematical tools needed to understand machine learning include linear algebra analytic geometry matrix decompositions vector calculus optimization probability and statistics These topics are traditionally taught in disparate courses making it hard for data science or computer science students or professionals to efficiently learn the mathematics This self contained textbook bridges the gap between mathematical and machine learning texts introducing the mathematical concepts with a minimum of prerequisites It uses these concepts to derive four central machine learning methods linear regression principal component analysis Gaussian mixture models and support vector machines For students and others with a mathematical background these derivations provide a starting point to machine learning texts For those learning the mathematics for the first time the methods help build intuition and practical experience with applying mathematical concepts Every chapter includes worked examples and exercises to test understanding Programming tutorials are offered on the book s web site

Pixl November2014 Maths Introduction

Free PDF Books and Manuals for Download: Unlocking Knowledge at Your Fingertips In todays fast-paced digital age, obtaining valuable knowledge has become easier than ever. Thanks to the internet, a vast array of books and manuals are now available for free download in PDF format. Whether you are a student, professional, or simply an avid reader, this treasure trove of downloadable resources offers a wealth of information, conveniently accessible anytime, anywhere. The advent of online libraries and platforms dedicated to sharing knowledge has revolutionized the way we consume information. No longer confined to physical libraries or bookstores, readers can now access an extensive collection of digital books and manuals with just a few clicks. These resources, available in PDF, Microsoft Word, and PowerPoint formats, cater to a wide range of interests, including literature, technology, science, history, and much more. One notable platform where you can explore and download free Pixl November2014 Maths PDF books and manuals is the internets largest free library. Hosted online, this catalog compiles a vast assortment of documents, making it a veritable goldmine of knowledge. With its easy-to-use website interface and customizable PDF generator, this platform offers a user-friendly experience, allowing individuals to effortlessly navigate and access the information they seek. The availability of free PDF books and manuals on this platform demonstrates its commitment to democratizing education and empowering individuals with the tools needed to succeed in their chosen fields. It allows anyone, regardless of their background or financial limitations, to expand their horizons and gain insights from experts in various disciplines. One of the most significant advantages of downloading PDF books and manuals lies in their portability. Unlike physical copies, digital books can be stored and carried on a single device, such as a tablet or smartphone, saving valuable space and weight. This convenience makes it possible for readers to have their entire library at their fingertips, whether they are commuting, traveling, or simply enjoying a lazy afternoon at home. Additionally, digital files are easily searchable, enabling readers to locate specific information within seconds. With a few keystrokes, users can search for keywords, topics, or phrases, making research and finding relevant information a breeze. This efficiency saves time and effort, streamlining the learning process and allowing individuals to focus on extracting the information they need. Furthermore, the availability of free PDF books and manuals fosters a culture of continuous learning. By removing financial barriers, more people can access educational resources and pursue lifelong learning, contributing to personal growth and professional development. This democratization of knowledge promotes intellectual curiosity and empowers individuals to become lifelong learners, promoting progress and innovation in various fields. It is worth noting that while accessing free Pixl November2014 Maths PDF books and manuals is convenient and cost-effective, it is vital to respect copyright laws and intellectual property rights. Platforms offering free downloads often operate within legal boundaries,

ensuring that the materials they provide are either in the public domain or authorized for distribution. By adhering to copyright laws, users can enjoy the benefits of free access to knowledge while supporting the authors and publishers who make these resources available. In conclusion, the availability of Pixl November2014 Maths free PDF books and manuals for download has revolutionized the way we access and consume knowledge. With just a few clicks, individuals can explore a vast collection of resources across different disciplines, all free of charge. This accessibility empowers individuals to become lifelong learners, contributing to personal growth, professional development, and the advancement of society as a whole. So why not unlock a world of knowledge today? Start exploring the vast sea of free PDF books and manuals waiting to be discovered right at your fingertips.

FAQs About Pixl November2014 Maths Books

1. Where can I buy Pixl November2014 Maths books? Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a Pixl November2014 Maths book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
4. How do I take care of Pixl November2014 Maths books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.
6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets: You can create your own spreadsheet to track books read, ratings, and other details.
7. What are Pixl November2014 Maths audiobooks, and where can I find them? Audiobooks: Audio recordings of books,

perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google Play Books offer a wide selection of audiobooks.

8. How do I support authors or the book industry? Buy Books: Purchase books from authors or independent bookstores. Reviews: Leave reviews on platforms like Goodreads or Amazon. Promotion: Share your favorite books on social media or recommend them to friends.
9. Are there book clubs or reading communities I can join? Local Clubs: Check for local book clubs in libraries or community centers. Online Communities: Platforms like Goodreads have virtual book clubs and discussion groups.
10. Can I read Pixl November2014 Maths books for free? Public Domain Books: Many classic books are available for free as they're in the public domain. Free E-books: Some websites offer free e-books legally, like Project Gutenberg or Open Library.
