

TEXAS GARDENER'S FALL PLANTING GUIDELINES

Use this guide to determine the optimum planting dates for a fall garden in your area. Find your location on the zone map, select the vegetables you want to plant and then come across to the planting dates directly under your zone. If you live on the border of two zones, go by the earliest planting dates. The dates listed are suggested dates on which you can safely plant each crop. Since these dates are based on the first average freeze in the fall, it is possible to plant after these dates and still be successful — if the first actual freeze this year happens to be later than the average freeze date. Please note that we recommend using plants instead of seed for some crops. Fall-planted onions may not produce full-size onions in the northern zones but can be harvested in immature size depending on the weather.
