Plate Tectonics Worksheet

Label each figure by writing the type of plate boundary it shows.

1. _____

2. _____

3. _____

1. Divergent

2. Convergent

3. Transform

4. In your own words, state the theory of plate tectonics?

The theory that explains how large pieces of Earth's outermost layer, called tectonic plates, move and change shape.

5. Describe what happens when two plates carrying oceanic crust collide.

When two oceanic crust collide, one plate is subducted (the more dense, usually the older crust).

6. Describe what happens when two plates carrying continental crust collide.

When two continental plates collide, they buckle and thicken, which pushes continental crust upward creating mountain ranges.

7. Describe what happens when a plate carrying oceanic crust collides with a plate carrying continental crust.

When an oceanic crust collides with a continental crust, the ocean crust sinks (subducts) because it is thinner and more dense.

8. What happens along a subduction zone?

Subduction zones occur at a convergent boundary between an oceanic plate and continental plate. The more dense oceanic crust sinks.

9. What do most scientists believe is the driving force behind plate tectonics?

Convection currents

10. How do convection currents work (how they move the tectonic plates)?

Hot rock (expands) from deep within the Earth rises, but cooler rock near the surface sinks. Convection causes the oceanic lithosphere to move sideways and away from the mid-ocean ridge.

11. List 2 features that form along a convergent boundary.

Ocean/ocean = trench

Ocean/continent = trench

Continent/continent = mountain

12. List 2 features that form along a divergent boundary.

Ocean/Ocean = ridge

Continent/continent = rift valley

13. What is a transform boundary?

Plate boundary where two plates slip past each other, in opposite directions.
