Fashion Buying and Merchandising Rosy Boardman, Rachel Parker-Strak, Claudia E. Henninger, 2020-05-10 Fashion buying and merchandising has changed dramatically over the last 20 years. Aspects such as the advent of new technologies and the changing nature of the industry into one that is faster paced than ever before, as well as the shift towards more ethical and sustainable practices, have resulted in a dramatic change of the roles. As a result, contemporary fast fashion retailers do not follow the traditional buying cycle processes; step by step critical paths are wildly different, and there has been a huge increase in in-season buying as a response to heightened consumer demand. This textbook is a comprehensive guide to 21st century fashion buying and merchandising, considering fast fashion sustainability, ethical issues, omnichannel retailing, and computer-aided design. It presents an up-to-date buying cycle that reflects key aspects of fashion buying and merchandising, as well as in-depth explanations of fashion product development, trend translation, and sourcing. It applies theoretical and strategic business models to buying and merchandising that have traditionally been used in marketing and management. This book is ideal for all fashion buying and merchandising students, specifically second and final year undergraduate, as well as MA/MSc fashion students. It will also be useful to academics and practitioners who wish to gain a greater understanding of the industry today.

Indigenous Bodies, Cells, and Genes Joanna Ziarkowska, 2020-10-08 This book explores Native American literary responses to biomedical discourses and biomedicalization processes as they circulate in social and cultural contexts. Native American communities resist reductionism of biomedicine that excludes Indigenous and non-Western epistemologies and instead draw attention to how illness, healing, treatment, and genetic research are socially constructed and dependent on inherently racist thinking. This volume highlights how interventions into the hegemony of biomedicine are vigorously addressed in Native American literature. The book covers tuberculosis and diabetes epidemics, the emergence of Native American DNA discoveries in biotechnology, and the problematics of a biomedical model of psychiatry. The book

analyzes work by Louise Erdrich Sherman Alexie LeAnne Howe Linda Hogan Heid E Erdrich Elissa Washuta and Frances Washburn The book will appeal to scholars of Native American and Indigenous Studies as well as to others with an interest in literature and medicine **Developing and Maintaining Practical Archives** Gregory S.
