Hunt, 2015-10-05

The local food movement is one of the most active of current civil engagement social movements This work presents primary evidence from over 900 documents interviews and participant observations and provides the first descriptive history of local

food movement national policy achievements in the US from 1976 to 2013 and in the UK from 1991 to 2013 together with reviews of both the American and British local food movements It provides a US UK comparative context significantly updating earlier comparisons of American British and European farm and rural policies The comparative perspective shows that over time more effective strategies for national policy change required social movement building strategies such as collaborative policy coalitions capacity building for smaller organizations and policy entrepreneurship for joining together separate rural farming food and health interests In contrast narrowly defined single issue campaigns often undermined long term policy change even if short term wins emerged By profiling interviews of American and English movement leaders policymakers and funders the book demonstrates that democratic participation in food policy is best supported when funders incentivize groups to work together and overcome their differences

The Political Economy of Climate Finance

Effectiveness in Developing Countries Mark Purdon,2024 In The Political Economy of Climate Finance Effectiveness in Developing Countries Mark Purdon contributes to broader debates on the international climate cooperation by evaluating how three different climate finance instruments have been undertaken in three countries Tanzania Uganda and Moldova and evaluates their effectiveness in actually reducing emissions He shows that the effectiveness of climate finance tools depends on the interaction between a nation s development policy paradigms and its interests in other sectors of their economies Purdon s findings further inform the design of international and transnational efforts to engage developing countries on climate change mitigation by emphasizing the importance of domestic politics and the state
