coevolution than the result of top down intelligent design Richard Dawkins famously said that a chicken is an egg's way of making another egg Is a human a computer's way of making another computer To understand this question requires a deep dive into how evolution works how humans are different from computers and how the way technology develops resembles the emergence of a new life form on our planet Lee presents the case for considering digital beings to be living then offers counterarguments What we humans do with our minds is more than computation and what digital systems do be teleported at the speed of light backed up and restored may never be possible for humans To believe that we are simply computations he argues is a dataist faith and scientifically indefensible Digital beings depend on humans and humans depend on digital beings More likely than a planetary wipe out of humanity is an ongoing symbiotic coevolution of culture and technology
