original WW2 records and historical fact with thoughtful analysis and insights Using unique maps photographs logbook pages and interviews and anecdotes it crafts a deeply personal story that will resonate with fans of both military history and memoir The Job To Be Done is a heartfelt tribute and a uniquely rewarding reading experience *The Radicals' City: Urban Environment, Polarisation, Cohesion* Ralf Brand,Sara Fregonese,2016-02-24 Bringing together comparative case studies from Belfast Beirut Amsterdam and Berlin this book examines the role of the urban environment in social polarisation processes In doing so it provides a timely and refreshingly innovative voice in the confusing babble on counter terrorism urban conflict and community cohesion Despite their socio political differences these cities are telling cases of how the location and shape of very mundane objects such as rubbish bins bridges clothes stores shopping malls and caf s in addition to the obvious fences walls and barbed wire are often subject to heated controversies and influence the way urban conflict is lived and practised Within a Science and Technology Studies STS theoretical framework the authors provide a systematic analysis of these four cities and provide many concrete and richly illustrated examples of material agency without losing sight of their specific historical political geographical and social conditions The STS angle permits some surprising yet extremely convincing conclusions which are of use not only for a range of practitioners but also to scholars interested in the social shaping processes and the consequences of urban artefacts The authors argue that although architecture and urban design is clearly not the sole cause of conflict and polarisation neither is it completely innocent Conversely it cannot be the silver bullet to solve related problems and to create community cohesion However the materiality of our cities must not be ignored in fact it can and should be enrolled in our efforts The book contains detailed descriptions of such positive cases as inspiration for practitioners as diverse as policy makers architects urban designers planners community workers consultants or police officers *October Song* Paul Le Blanc,2017-11-14 A panoramic account of the Russian Revolution of 1917 and its aftermath animated by the lives ideas and experiences of workers peasants intellectuals artists and revolutionaries of diverse persuasions October Song vividly narrates the triumphs of those who struggled for a new society and created a revolutionary workers state Yet despite profoundly democratic and humanistic aspirations the revolution is eventually defeated by violence and authoritarianism October Song highlights both positive and negative lessons of this historic struggle for human liberation Public Health for Children Diane DeBell,2015-12-10 This re titled new edition of Public Health Practice and the School age Population has been updated and expanded to include children of all ages Following radical changes in public health provision Public Health for Children Second Edition examines the implications for children and young adults as well as for those who provide care prevention *A Southern Criminology of Violence, Youth and Policing* Roxana Pessoa Cavalcanti,2020-03-19 A Southern Criminology of Violence Youth and Policing examines public experiences of insecurity and the social impacts of security programmes that aim to address violence in Brazil This book contributes to the emerging field of southern criminology by engaging with the perils faced by people living in favelas in Brazil and critically investigating the

discourse of state actors It combines original ethnographic data with critical analysis to expand understandings of violence and control in urban and postcolonial contexts This study challenges dominant practices and notions of security and control Its objective is to decolonise knowledge and shed light on issues relating to policing coercion and the great socioeconomic historical and spatial inequalities that shape the lives of millions of people in the Global South The findings of this book expose the exacerbation of social problems by the expansion of the penal and crime industry unsettling the applicability and universalism of mainstream managerial criminology The evidence reveals that new modes of securitisation have not addressed long standing issues of sexism racism classism and brutalisation in the police Moreover through the increasing use of methods of control and incarceration security programmes have failed to prevent diverse forms of violence and challenge the expansion of organised crime Instead they have exacerbated the inequalities that affect the most marginalised populations Written in a clear and direct style this book will appeal to students and scholars in criminology sociology cultural studies social theory and those interested in learning about the social injustices that exists in the Global South

Germany But that bargain would not unfold as envisioned The lives of Stalin and Hitler and the fates of their respective dictatorships drew ever closer to collision as the world hung in the balance Stalin Waiting for Hitler 1929 1941 is a history of the world during the build up to its most fateful hour from the vantage point of Stalin s seat of power It is a landmark achievement in the annals of historical scholarship and in the art of biography
