New Shopping Malls:

China's New Retail Economy Shuguang Wang, 2014-01-10 Retail is the essential link between production and consumption. The dynamics of a nation's economy cannot be fully understood without a good understanding of its retail sector. This book is written to achieve three broad objectives. First, it provides a comprehensive assessment of the changes in consumption patterns in China, the current size of the Chinese consumer market and the regional variations. Second, it presents an interpretation of the changes in the country's regulatory system and the corresponding policy initiatives, including the new state spatial strategies devised after its admission to the WTO. Third, it delivers a systematic analysis of the transformation of China's retail sector. This includes the entry and expansion of foreign retailers, the development of indigenous retail chains as a national strategy to modernize China's retail industry and the changing retailer-supplier relations. This book is a useful reference not only for university students and faculty researchers but also for international retailers and commercial real estate developers who contemplate business and investment opportunities in China.

Acculturating the Shopping Centre Janina Gosseye, Tom Avermaete, 2018-10-16 *Acculturating the Shopping Centre* examines whether the shopping centre should be qualified as a global architectural type that effortlessly moves across national and cultural borders in the slipstream of neo-liberal globalization or should instead be understood as a geographically and temporally bound expression of negotiations between mall developers, representatives of a global logic of capitalist accumulation on the one hand and local actors, architects, governments, citizens on the other. It explores how the shopping centre adapts to new cultural contexts and questions whether this commercial type has the capacity to disrupt or even amend the conditions that it encounters. Including more than 50 illustrations, this book considers the evolving architecture of shopping centres. It would be beneficial to academics and students across a number of areas such as architecture, urban design, cultural geography and sociology.

Shopping Centre Development (RLE Retailing and Distribution) John Dawson, Dennis Lord, 2012-10-02 The shopping centre has become an established feature of urban structure over the past thirty years. Development of centres has been rapid and little attempt has been made to consider the development process and the problems caused by it. There is a growing awareness that centres are not always wholly beneficial to their host cities and that some public policy control is necessary. This book examines the shopping centre development process and analyses the control policies which have been taken and which are needed. It draws on material from throughout the developed world. First published 1985.
