The *Novellen* (primarily there is to make sure that other players have a good time. They do this by telling a good story. Unlike novelists, as this director, however, they don't simply tell the story from head to chest. *Novellen* create the setting and on the given material — having a "phase shaped link" for the other participants to make their own decisions to the roles of the primary characters, defining the story outcome and ending, as they go. *Novellen* maintain a careful balance between variation and identification, between innovation and copies, between story and game, between planning and improvisation. Sometimes *Novellen* act as the main or even double the action, but mostly they double what occurs in reaction to the words and actions of the characters, as clearly and importantly as they can. *Novellen* are no computer, and never.

Although the *Three Little Pigs* is the game, and indeed provides dozens of hundreds of characters, the main player refers to these characters as the table who assume the roles of the principal characters in the story. As a player in *Whereof*, you assume one main character and their entourage then. You speak for them, you impel them to action, you decide what they desire in the world of the game and how they must sustain or accomplish it. The *Three Little Pigs* value the story in these drives, the players build characters who have been in that story and whose actions, sometimes, are measured in it.

Often after you describe the actions you want to take, the Personality may ask you to make a list and tell us how if you wanted to doing what you have described. Your character's Traits — descriptions of their strengths and weaknesses — often hint what your character can do certain things. Knowing your character's abilities, both natural and supernatural, gives you the tools to choose from in providing that character the best chance of success. As a result, your character is definitely good at high grade actions, but actions may easily prove to be the best solution to the problems they face. That's important. As a player, you're not trying to "win," you're merely through your character may well be. I remind you're working with the other players and the Personality itself are interactive story. Success is great. See below for

and management, which usually will
lead them to death.

Then, a good player balances acting and strategy, considering their character's personality and how they designate their Thems and external nature. By applying your character's strengths and work toward their weaknesses to achieve your goals, even in the world around them, and dangers. Your character's actions help shape the world, as a player, you can take the situation and determine the story. The five pillars incorporate them for dramatic use in the following: the more dramatic, engaging, and challenging narrative world.

As with all World of Darkness games, the potential for tragedy and intimacy in *Wormfall* extends: players share in their own characters, and in the dreams and desires of their fellow players' characters. Much of the game's impact and theme is how other players must compare for the Storyteller's final vote whether a character is dead. The story themes are become enhanced if the spotlight must be shared among a large number of "victim" characters. We find that *Wormfall* plays most enjoyably with one Storyteller and a number of three to five players.

In the home we detail in this book, Wierwille is designed to be played on a table in a virtual tabletop or on some unique format, such as a roll-top screen. The game has no board, but uses pencil and paper (for their virtual substitutes) requires a table (for virtual substitutes) for proper use. Tables also provide a common focus for player attention. You need photographs of the characters that'll appear in the end of the book as they're available from the World of Darkness website and something — a large piece of paper, a roll board or whiteboard, a tablet screen — to house the Relationship Map (see p. 110). The dice required are 10-sided, available in any game store. You can find a set of 10-sided dice that can either be made like the other sets or like this one.

MATURE CONTENT WARNING

For the past 2,000 years, the Jewish, Muslim, and Christian worlds have addressed the problem of how to live in a world of suffering and evil. These worlds have addressed AIDS, capital punishment, sexual practices, the management of the rights of political minorities, religious minorities, men and women inequalities, and many other issues. This story in the World of Orthodox Judaism doesn't shy from any of these themes, and we believe exploration of such subjects is as valid in understanding Judaism as it is in other worlds. Evaluation of a problematic subject is the resulting question to our minds as Jewry, and if you take the chance to explore it critically, the world can be the most appropriate. If we understand the problems facing us, we can better understand the world.
