*Surviving the 21st Century* Julian Cribb,2016-09-20 The book explores the central question facing humanity today how can we best survive the ten great existential challenges that are now coming together to confront us Besides describing these challenges from the latest scientific perspectives it also outlines and integrates the solutions both at global and individual level and concludes optimistically This book brings together in one easy to read work the principal issues facing humanity It is written for the two next generations who will have to deal with the compounding risks they inherit and which flow from overpopulation resource pressures and human nature The author examines ten intersecting areas of activity mass extinction resource depletion WMD climate change universal toxicity food crises population and urban expansion pandemic disease dangerous new technologies and self delusion which pose manifest risks to civilization and potentially to our species long term future This isn t a book just about problems It is also about solutions Every chapter concludes with clear conclusions and consensus advice on what needs to be done at global level but it also empowers individuals with what they can do for themselves to make a difference Unlike other books it offers integrated solutions across the areas of greatest risk It explains why Homo sapiens is no longer an appropriate name for our species and what should be done about it

*Capitalism and Environmental Collapse* Luiz Marques,2020-08-17 This book intends to be an alert to the fact that the curve measuring environmental costs against the economic benefits of capitalism has irreversibly entered into a

negative phase The prospect of an environmental collapse has been evidenced by the sciences and the humanities since the 1960s Today it imposes its urgency This collapse differs from past civilizations in that it is neither local nor just civilizational It is global and occurs at the broadest level of the biosphere accelerated by the convergence of different socio environmental crises such as Earth energy imbalance climate change and global warming Sea level rise Decrease and degradation of forests Collapse of terrestrial and aquatic biodiversity Floods droughts wildfires and extreme weather events Degradation of soils and water resources Increase in pollution caused by fossil fuels and coal Increase in waste production and industrial intoxication The book is divided in two parts In the first part it presents a comprehensive review of scientific data to show the already visible effects of each of the different environmental crises and its consequences to human life on Earth In the second part Luiz Marques critically discusses what he calls the three concentric illusions that prevent us from realizing the gravity of the current socio environmental crises the illusion of a sustainable capitalism the illusion that economic growth is still capable of providing more well being and the anthropocentric illusion Finally Marques argues that fitting back into the biosphere will only be possible if we dismantle the expansive socioeconomic gear that has shaped our societies since the 16th century by moving from a Social Contract to a Natural Contract which takes into account the whole biosphere According to him the future society will be post capitalist or it will not be a complex society and even perhaps we must fear no society at all This book is backed up with the latest and best science and has made the complexities understandable for the average reader all in a context of hope for the future William J Ripple PhD Distinguished Professor of Ecology Director of the Alliance of World Scientists Oregon State University

**Mind Shift** John Parrington, 2021-04-22 John Parrington argues that social interaction and culture have deeply shaped the exceptional nature of human consciousness The mental capacities of the human mind far outstrip those of other animals Our imaginations and creativity have produced art music and literature built bridges and cathedrals enabled us to probe distant galaxies and to ponder the meaning of our existence When our minds become disordered they can also take us to the depths of despair What makes the human brain unique and able to generate such a rich mental life In this book John Parrington draws on the latest research on the human brain to show how it differs strikingly from those of other animals in its structure and function at a molecular and cellular level And he argues that this shift enlarging the brain giving it greater flexibility and enabling higher functions such as imagination was driven by tool use but especially by the development of one remarkable tool language The complex social interaction brought by language opened up the possibility of shared conceptual worlds enriched with rhythmic sounds and images that could be drawn on cave walls This transformation enabled modern humans to leap rapidly beyond all other species and generated an exceptional human consciousness a sense of self that arises as a product of our brain biology and the social interactions we experience Our minds even those of identical twins are unique because they are the result of this extraordinarily plastic brain exquisitely shaped and tuned by the social and cultural environment in which we grew up and to which we continue to

respond through life Linking early work by the Russian psychologist Lev Vygotsky to the findings of modern neuroscience Parrington explores how language culture and society mediate brain function and what this view of the human mind may bring to our understanding and treatment of mental illness

**Christian Foundations for Law and Science** Gregory J. Glaser,2023-07-06 In biblical Hebrew there is a word that means both God and nothing Paradoxically what if God himself is simultaneously the All and the Nothing Would this help explain why God is invincible and paradoxical Paradoxes fill reality with opposites routinely manifesting as the same thing at their extremes Like the rugged earth there is danger amidst opportunity here While we study paradoxes to strengthen our connection with God surprisingly in the process we learn about Satan s hypocrisies that crudely mimic paradoxes in our lives The Bible teaches that Satan is a lying imitator and a murderer Why would God desire to teach us about God s own paradoxical creative power by comparison to Satan s destructive power of hypocrisy Much of the Bible is devoted to answering this question by exposing hypocrisies in human culture and character The Messiah particularly exposed the teachers of the law scribes and Pharisees as hypocrites When we get deeply self honest we know God is just because we open our minds to possibilities that everything happens for a reason where even the crucifixion of God s son creates healing ultimately
