Duffy,Idana Goldberg,2014-07-14 Admissions and financial aid policies at liberal arts colleges have changed dramatically since 1955

Through the 1950s most colleges in the United States enrolled fewer than 1000 students nearly all of whom were white Few colleges were truly selective in their admissions they accepted most students who applied In the 1960s as the children of the baby boom reached college age and both federal and institutional financial aid programs expanded many more students began to apply to college For the first time liberal arts colleges were faced with an abundance of applicants which raised new questions What criteria would they use to select students How would they award financial aid The answers to these questions were shaped by financial and educational considerations as well as by the struggles for civil rights and gender equality that swept across the nation The colleges answers also proved crucial to their futures as the years since the mid 1970s have shown When the influx of baby boom students slowed colleges began to recruit aggressively in order to maintain their class sizes In the past decade financial aid has become another tool that colleges use to compete for the best students By tracing the development of competitive admission and financial aid policies at a selected group of liberal arts colleges *Crafting a Class* explores how institutional decisions reflect and respond to broad demographic economic political and social forces Elizabeth Duffy and Idana Goldberg closely studied sixteen liberal arts colleges in Massachusetts and Ohio At each college they not only collected empirical data on admissions enrollment and financial aid trends but they also examined archival materials and interviewed current and former administrators Duffy and Goldberg have produced an authoritative and highly readable account of some of the most important changes that have taken place in American higher education during the tumultuous decades since the mid 1950s *Crafting a Class* will interest all readers who are concerned with the past and future directions of higher education in the United States Originally published in 1997 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

**Higher Education in the Global Age** Daniel Araya, Peter Marber, 2013-11-20 Discussions on globalization now routinely focus on the economic impact of developing countries in Asia Africa the Middle East the former Soviet Union and Latin America Only twenty five years ago many developing countries were largely closed societies Today the growing power of emerging markets is reordering the geopolitical landscape On a purchasing power parity basis emerging economies now constitute half of the world's economic activity Financial markets too are seeing growing integration Asia now accounts for 13 of world stock markets more than double that of just 15 years ago Given current trajectories most economists predict that China and India alone will account for half of global output by 2050 almost a complete return to their positions prior to the Industrial Revolution How is higher education shaping and being shaped by these massive tectonic shifts As education rises as a geopolitical priority it has converged with discussions on economic policy and a global labor market As part of the Routledge Studies in Emerging Societies series this edited collection focuses on the globalization of higher education particularly the increasing symbiosis between advanced and developing countries Bringing together senior scholars journalists and practitioners from around the world this collection explores the relatively new and changing higher education landscape      **Runaway College Costs** James V. Koch, Richard J. Cebula, 2020-10-13 What role have governing boards played in tuition and fee escalation at four year public colleges and universities In the United States college costs especially tuition and fees have increased much more rapidly than either the overall Consumer Price Index or median household income This cost inflation has effectively closed the doors of higher education to many qualified students and contributed to a staggering 1.5 trillion in student debt Additionally the number of college enrollments in the United States actually declined for eight straight years between 2011 and 2019 as college student bodies became increasingly stratified on the basis of family incomes Virtually every public college cost increase however requires a positive vote from each university's governing board and the record shows that these votes are nearly always unanimous In Runaway College Costs James V Koch and Richard J Cebula argue that many trustees have forgotten that they should act as fiduciaries who represent the best interests

of students parents and taxpayers Instead Koch and Cebula explain too often many trustees prize size and more prestigious rankings over access and affordability These misplaced priorities make them vote in favor of ever more plush facilities expensive intercollegiate athletic programs administrative bloat and outdated models of instruction and research Koch and Cebula supply groundbreaking empirical evidence on the impact of governing board membership size and operations on tuition and fees They show for example that the existence of a powerful statewide governing board exercises significant downward pressure on tuition and fees and that state funding cuts cannot explain more than one half of the cost increases at the typical four year public institution The authors propose an action agenda for governing boards including changing the incentives placed in front of campus presidents and senior administrators Finally they conclude that although public university governing boards deserve blame for accelerating college cost inflation they also are ideally situated to improve the situation Runaway College Costs ends hopefully suggesting that governing boards and their member trustees actually have the greatest potential to improve the situation Providing the first rigorous empirical evidence of the impact that various modes of governance have had not only on tuition and fees but also on a half dozen measures of institutional performance this book will be of serious interest to governors legislators public university board members and their staffs those interested in supporting the traditional goals of public higher education and of course students and their parents as well as taxpayers

**Between Mission and Market** Daniel Rosenberg, 2017-04-26 Between Mission and Market The Freshman Year in a Corporate Age focuses on the arrival of college freshmen at the moment of the transformation it uses Adelphi University in suburban New York City to study an attempt to resolve first year difficulties As higher education institutions turn into enterprises run on business models the pressures of getting into college including the taking of the SAT and ACT have induced stress addictions eating disorders drug use and mental problems However special programs to ease the first year transition through counseling and support are run as cheaply as possible This book confronts some of the cardinal controversies in higher education particularly those affecting first year students high stakes testing in general particularly the SAT the intensification of student debt and the financial sentence imposed upon all who incur it and the dramatic pressures placed upon freshmen as they transition to college

***Making, Keeping, and Losing Friends*** Janice M. McCabe, 2025-10-21 Draws attention to the importance of support networks for students as they make keep and lose friends throughout college and beyond We re all familiar with the sentiment that college is the best time of your life Along with a newfound sense of freedom students have a unique opportunity to forge lifelong friendships at a point in life when friendship is particularly important Why is it then that so many college students are falling victim to what the US Surgeon General termed an epidemic of loneliness and isolation How do different aspects of college life help or hinder students ability to form deep connections In *Making Keeping and Losing Friends* How Campuses Shape College Students Networks sociologist Janice M McCabe shows that the way a college is structured whether students live in dorms or commute study abroad or stay close to campus have plentiful common areas for clubs to meet or not can either encourage or hinder the making of meaningful friendships Based on interviews with 95 students on three distinct campuses a small private college Dartmouth College a large public university University of New Hampshire and a non residential community college Manchester Community College McCabe captures a wide range of experiences and discovers how features of the campuses make it easier or harder for students to make and keep friends She shows how and why across all three institutions some students thrive in deep and lasting friendships with their peers As McCabe s research reveals we need to look at the structures of students networks the institutions they attend and the importance of their identities in these places if we are to truly uncover and address the loneliness epidemic facing today s young adults

***Pay-to-Play*** Ryan Kraski, 2021-07-16 Pay to Play bietet einen zug nglichen Ansatz zum Verst ndnis zweier Systeme zur Wissenserschaffung und verbreitung die in das US Rechtssystem eingebettet sind private gemeinn tzige Universit ten und das Urheberrecht Pay to Play zeigt die harte Realit t auf dass ein umfangreicher Bestand an akademischen Werken hinter gewinnorientierten digitalen Paywalls verschlossen bleibt Der Zugang zu diesen Werken ist f r den Einzelnen unerschwinglich und wird in der Regel nur durch noch teurere institutionelle Mitgliedschaften erm glicht Infolgedessen werden die meisten Menschen unn tigerweise vom Innovationsprozess ausgeschlossen der den Kern der Urheberrechtsklausel der Verfassung darstellt

***University Rankings*** Jung Cheol Shin, Robert K. Toutkoushian, Ulrich Teichler, 2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases methodological issues societal impact and policy implications providing readers with a deep understanding of these controversial comparators The authors propose that university rankings are misused by policymakers and institutional leaders alike They assert that these interested parties overlook the highly problematic internal logic of ranking

methodologies even as they obsess over the surveys assessment of their status The result is that institutions suffer from short termism realigning their resources to maximize their relative rankings While rankings are widely used in policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself It is a welcome contribution to an often highly charged debate Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties

University Rankings William Yat Wai Lo, 2014-02-17 This book adopts a qualitative case study approach to provide the readers with a systematic delineation and interpretation of the implications of the university ranking phenomenon for Taiwan s higher education system It reviews the literature on different theories concerning the global transformation of higher education and presents basic information on higher education in Taiwan The author develops a four dimensional framework for the analysis of the ranking phenomenon in the island state First the technological ecological dimension aims to look into how the rankings have impacted Taiwan s higher education based on empirical findings from five Taiwanese public universities Next the technological geographical dimension examines how Taiwan can use rankings to promote its interests in global higher education The two conceptual dimensions focus on the relationship between the rankings and power in higher education They show how the phenomenon can be read and explained through theoretical lenses from ecological and geographical perspectives From an ecological perspective the empirical evidence suggests that the influence of rankings varies throughout the academic hierarchy in Taiwan The theoretical analysis then illustrates the relationship between the ranking phenomenon and the power structure in academic hierarchy Geographically while the empirical analysis is based on data from Taiwan the theoretical analysis offers essential insights that help readers to understand the changing global landscape of higher education and its implications in East Asia
