Martin Peston, 2010-04-28 I have owned telescopes for over 25 years since I was a young lad. I purchased an LX D55 AR 6 Refractor in 2002 and was one of the first to own one in the UK. I am also a proud owner of an LX D75 SC 8. Armed with these two very different telescopes, I have spent many hours searching the skies for interesting objects using Meade's Autostar Goto facility. My motivation to write a book about the LX D Goto telescope series first came from comments about an LX D55 AR 6 Refractor review that was published on the LX D55.com website. From then on, I have had regular emails from people asking technical questions about the telescope and which model is best suited for them. Whilst attending Star parties in the UK, I found that many LX D owners would struggle to use them even at a basic level, especially if they have never owned or used an equatorially mounted Goto telescope before. Since the first LX D55 models came out in early 2002, owners have struggled to find useful information to help them use the telescopes to the best advantage. There have been mixed reactions about its quality and performance. Hence, this book is directed towards those who are new to Goto and the LX D telescope.

Manual of Astronomy Robert William Shaw, Samuel Latimer Boothroyd, 1902 **The NexStar User's Guide** Michael Swanson, 2012-12-06 Michael Swanson's online discussions with literally thousands of NexStar owners made it clear that there was a desperate need for a book such as this one that provides a complete, detailed guide to buying, using and maintaining NexStar telescopes. Although this book is highly comprehensive, it is suitable for beginners; there is a chapter on Astronomy Basics and experts alike. Celestron's NexStar telescopes were introduced in 1999, beginning with their first computer-controlled go-to model, a 5-inch. More models appeared in quick succession and Celestron's new range made it one of the two dominant manufacturers of affordable go-to telescopes. **Manual of Astronomy** Robert William Shaw, Samuel Latimer Boothroyd, 1958 [A Guide to Hubble Space Telescope Objects](#) James L. Chen, Adam Chen, 2015-07-16 From the authors of *How to Find the Apollo Landing Sites*, this is a guide to connecting the view above with the history of recent scientific discoveries from the Hubble Space Telescope.
