An Educator's Guide to STEAM Cassie F. Quigley, Danielle Herro,

This updated and expanded edition is essential reading for K-8 teachers who want to keep pace with fast moving technological advancements and honor their students interests and cultures. The authors provide updated problem solving scenarios to assist with STEAM curriculum design, additional information on AI powered tools with guidance for effective implementation, attention to current topics in science such as climate change, cybersecurity and the ethical implications of AI, and lesson plans and activities to enhance the guide's practical application in today's classrooms. Readers will find easy to understand examples of what STEAM education looks like in a variety of classrooms and will hear from teachers, instructional coaches, principals and administrators about what it takes to ensure that STEAM is a schoolwide success. Each chapter of this popular text incorporates elements of connected learning, a type of learning that draws on students interests that teachers can capitalize on when using STEAM to address real world problems. Book Features: A practical teaching guide that uses classroom scenarios relevant to today's students; A conceptual model with specific strategies such as problem based learning, student choice, technology integration and teacher facilitation; Updated with an increased focus on emerging technologies, culturally relevant strategies and lessons from classrooms; Materials to support authentic assessment such as rubrics, STEAM units and formative assessment examples.

Using the Next Generation Science Standards With Gifted and Advanced Learners Cheryll M. Adams, Alicia Cotabish, Mary Ricci, 2021-10-03 Using the Next Generation Science Standards With Gifted and Advanced Learners provides teachers and administrators examples and strategies to implement the Next Generation Science Standards (NGSS) with gifted and advanced learners at all stages of development in K-12 schools. The book describes and demonstrates with specific examples from the NGSS what effective differentiated activities in science look like for high ability learners. It shares how educators can provide rigor within the new standards to allow students to demonstrate higher level thinking, reasoning, problem solving, passion and inventiveness in science. By doing so, students will develop the skills, habits of mind and attitudes toward learning needed to reach high levels of competency and creative production in science fields.
