and in this light the research looks beyond the quantitative study of attitude to investigate the nature of the subjective experience of learning or not learning mathematics Disaffection with school mathematics is characterized as a motivational and emotional phenomenon and Reversal Theory is introduced as a robust theory which is used as an interpretative framework to account for students affective experience of school mathematics and to inform the design of a range of novel methods Overall the book develops and presents a deep description of the landscape of disaffection as experienced by and in the voice of students Some empirical and theoretical implications of the study are discussed
