**Laboratory Exercises in Plant Pathology: An Instructional Kit (Teachers Manual)** A.B.A.M. Baudoin, 2011-01-13

The Teacher's manual contains information designed to facilitate use of this kit by instructors and teaching assistants who may not be familiar with a particular plant pathogen system. Included are additional background information for instructors, sources of materials, list of materials needed, step-wise preparation procedures, suggested schedules for conducting the exercises, including time required, a discussion of expected results, answer to questions, and additional references. The listing of sources of material provided in case material is not available from a local source or regular supplier.

**Atlas and Manual of Plant Pathology** E.H. Barnes, 2012-12-06 Ideally a textbook should integrate with the lectures and labs in a science course. Selecting such a book can be an onerous and sometimes impossible task for the teacher. Students are wary of getting stuck with a useless book, i.e. one to which the instructor never refers. The reader probably has some practical appreciation of their concern. I remember an instructor who not only denounced the very text he had chosen but also informed the class that he wouldn't be using it. This was after I had already purchased a copy. Being mindful of the foregoing, I decided to try Barnes' Atlas and Manual of Plant Pathology in 1973. Six years and 800 students later, I have no regrets about my choice. As far as I am concerned, it is still the finest book of its kind on this continent. Barnes' Atlas contains an excellent blend of the diagnostic and experimental aspects of plant pathology. His treatment of each disease on an individual basis allows the instructor to omit some pathogens without disturbing the book's continuity. My one semester course in Forest Pathology is largely descriptive. Strong emphasis is placed on field recognition of symptoms and signs. This is facilitated by Barnes' technique. In a sequence of photographs, the diseased plant or part is first viewed as a whole to show the general symptoms. This is usually followed by a close-up of the signs, i.e.
