

An abstract painting with a warm, yellowish-orange background. A large, black, stylized silhouette of a person or animal is positioned in the upper left, with a long, thin line extending from its body towards the right. In the upper right corner, there is a semi-circular shape with a gradient of colors from red to orange to yellow, resembling a sunset or a moon. Below this, there are several horizontal black lines of varying lengths. In the lower center, there are several thin, dark, branching lines that look like stylized trees or reeds. The bottom of the painting features a dark blue, wavy shape that suggests water or a horizon. The overall style is expressive and modern.

Education Dennis Johannßen, Dominik Zechner, 2022-11-03 Bringing Walter Benjamin into dialogue with the urgent issues facing educational institutions today this is the first comprehensive exploration of his philosophy of education and pedagogy In recent years problems concerning the practice of education have become central to the critical discourse in the humanities from debates regarding deplatforming and the redefinition of free speech on campus to the digitization of learning and the ethics of mentorship But where do we go from here This volume argues that Walter Benjamin s writing offers critical tools to rethink the purposes of education and the institutional forms it should assume Reaching from his earliest writings during his involvement with the antebellum German Youth Movement to his late essays on history theatre and new media the authors here explore how Benjamin argued against education as an institutional task subject to a scientific discipline They show instead how he took his cue from language as a medium of subtle understanding to critically analyze the forms of violence inherent in the concept and history of education For Benjamin education was the lever to political reform For him the experience of youth should always be at the centre of considerations Written by leading international scholars Walter Benjamin and Education both contextualizes Benjamin s pedagogy in the trajectory of his own thought and also offers an astute analysis of the value and relevance of his student focused ideas to the institutional and political challenges of today

Mediamorphosis Shai Biderman, Ido Lewit, 2016-02-26 The idea of a visual manifestation of the work of Franz Kafka was denied by many first and foremost by Kafka himself who famously urged his publisher to avoid an image of an insect on the

cover of *Metamorphosis* Be that as it may it is unlikely that such a central progenitor of twentieth century art and thought as Kafka can be fully understood without reference to the revolutionary artistic medium of his century cinema *Mediamorphosis* compiles articles by some of today's leading forces in the scholarship of Kafka as well as film studies to provide a thorough investigation of the reciprocal relations between Kafka's work and the cinematic medium The volume approaches the theoretical integration of Kafka and cinema via such issues as the cinematic qualities in Kafka's prose and the possibility of a visual manifestation of the Kafkaesque Alongside these debates the book investigates the capacity of cinema to incorporate and express the unique qualities of a Kafkaesque world through an analysis of cinematic adaptations of Kafka's prose such as Michael Haneke's *The Castle* 1997 and Straub Huillet's *Class Relations* 1984 as well as films that carry a more subtle relation to Kafka's oeuvre such as the cinematic works of David Cronenberg the films of the Coen brothers Chris Marker's film essay *Charlie Chaplin's tramp* and others

The Babylonian Planet Sonja Neef, 2021-11-04 What is astro culture In *The Babylonian Planet* it is unfolded as an aesthetic an idea a field of study a position and a practice It helps to engineer the shift from a world view that is segregated to one that is integrated from global to planetary from distance to intimacy and where closeness and cosmic distance live side by side In this tour de force Sonja Neef takes her cue from Edouard Glissant's vision of multilingualism and reignites the myth of the Tower of Babel to anticipate new forms of cultural encounter For her Babel is an organic construction site at which she fuses theoretical analysis and case studies of artists writers and thinkers like William Kentridge Orhan Pamuk and Immanuel Kant Her skilful interrogations then allow her to paint a portrait of art and culture that abolishes the horizon as a barrier to vision and reclaims it as a place of contact and relation By combining the Babylonian concept of the encounter and the planetary concept of the whole earth Neef creates a space an astro culture in which she can examine topics as varied as language translation media modernity migration and the moon In doing so she instigates a renewed cultural understanding receptive to the kinder forms of cultural encounter and globalisation she hopes will come

Combatting Cyberbullying in Digital Media with Artificial Intelligence Mohamed Lahby, Al-Sakib Khan Pathan, Yassine Maleh, 2023-12-13

Rapid advancements in mobile computing and communication technology and recent technological progress have opened up a plethora of opportunities. These advancements have expanded knowledge, facilitated global business, enhanced collaboration, and connected people through various digital media platforms. While these virtual platforms have provided new avenues for communication and self-expression, they also pose significant threats to our privacy. As a result, we must remain vigilant against the propagation of electronic violence through social networks. Cyberbullying has emerged as a particularly concerning form of online harassment and bullying, with instances of racism, terrorism, and various types of trolling becoming increasingly prevalent worldwide. Addressing the issue of cyberbullying to find effective solutions is a challenge for the web mining community, particularly within the realm of social media. In this context, artificial intelligence (AI) can serve as a valuable tool in combating the diverse manifestations of cyberbullying on the Internet and social networks. This book presents the latest cutting-edge research, theoretical methods, and novel applications in AI techniques to combat cyberbullying. Discussing new models, practical solutions, and technological advances related to detecting and analyzing cyberbullying is based on AI models and other related techniques. Furthermore, the book helps readers understand AI techniques to combat cyberbullying systematically and forthrightly, as well as future insights and the societal and technical aspects of natural language processing (NLP)-based cyberbullying research efforts.

Key Features

- Proposes new models, practical solutions, and technological advances related to machine intelligence techniques for detecting cyberbullying across multiple social media platforms.
- Combines both theory and practice so that readers, beginners or experts of this book, can find both a description of the concepts and context related to the machine intelligence.
- Includes many case studies and applications of machine intelligence for combating cyberbullying.

Advances in Artificial Intelligence, Software and Systems Engineering Tareq Z. Ahram, 2018-06-28

This book focuses on emerging issues following the integration of artificial intelligence systems in our daily lives. It focuses on the cognitive, visual, social, and analytical aspects of computing and intelligent technologies, highlighting ways to improve technology acceptance, effectiveness, and efficiency. Topics such as responsibility, integration, and training are discussed throughout. The book also reports on the latest advances in systems engineering with a focus on societal challenges and next-generation systems and applications for meeting them. It also discusses applications in smart grids and infrastructures, systems engineering education, as well as defense and aerospace. The book is based on both the AHFE 2018 International Conference on Human Factors in Artificial Intelligence and Social Computing, Software and Systems Engineering: The Human Side of Service Engineering and Human Factors in Energy, July 21-25, 2018, Loews Sapphire Falls Resort at Universal Studios, Orlando, Florida, USA.

It provides an opportunity to expand knowledge, establish connections with peers and contribute to the further advancement of the field. The book promises to be an engaging and informative for those passionate about distance learning technologies and its various applications.

The World of Games: Technologies for Experimenting, Thinking, Learning Daria Bylieva, Alfred Nordmann, 2023-11-23 This book reflects the various dimensions of play. It gathers together experience with role play, tabletop and online games and develops and assesses tools. It also reflects the human condition in this world of games as it becomes a digital world. We are living in a World of Games where every game is a world through which we learn about the world. A World of Games is fun and engaging but it also provides deceptive pleasures. What may seem like fun is far from harmless. And then there are the many ways of learning in the mode of play.
