Introductory chapters provide you with a strong foundation in the history and philosophy of science, logical reasoning, and the theory development process. Diagrams for theories help you visualize and better understand inherently abstract concepts. Each theorist chapter is written by a scholar specializing in that particular theorist's work, often an individual who has worked closely with the theorist. Most chapters have been reviewed and edited by the theorist for currency and accuracy, further validating the accounts set forth in the text. Theorist birth and, if applicable, death dates help you place each individual into a time context. A new chapter introduces the theorist Afaf Meleis and covers her Transition Theory that has helped shape the theoretical development of nursing. Points for further study at the end of each chapter direct you to assets available for additional information. Need-to-know information is highlighted in a glance summary boxes throughout to help you quickly review key concepts. Personal quotes from the theorists help you gain insight and make each complex theory more memorable. Updated references include only published works to ensure accuracy and credibility.
