Corruption in the MENA Region Dina Elsayed, 2020-11-02

This book explores the causes of corruption in the Middle East and North Africa through a systematic cross-national comparative analysis of fifteen countries in the region. It aims to explain causal relationships between corruption and differences in political and socio-economic dimensions within these different countries over the period 1999-2010. The countries are grouped together into three sub-regions: the Gulf region, North Africa, and Mashreq, plus Yemen. The author finds that the main variables that showed robustness in impacting the intensity of corruption are the rule of law, quality of regulations, and trade openness. Poverty rates and income inequality have been clear triggers for petty corruption. Meanwhile, natural resources endowments have shown less of an impact on the levels of corruption, and similarly, women's empowerment

has not been found to be a strong indicator **Countries and Concepts** Michael G.
