use children's picture books in their lessons. These books add depth and vitality to the curriculum because they are written and illustrated by some of the world's most gifted writers and artists. Yet educators are finding it increasingly harder to insert this pleasant and important activity into the busy school day due to increased pressures to improve test scores, to implement a standards-driven curriculum and to stay abreast of new technologies to deliver instruction. This book helps educators continue to incorporate literature into the school day in spite of these obstacles. *CyberLit* is a book for those who work with or teach others who work with children in the primary grades. It is for those who use trade books to supplement and enhance health, science, creative writing, history, geography, reading, math, language arts, character education, multicultural studies, holidays, citizenship and the fine arts. It is for those who love children's literature and book illustration. With this book you no longer need to get lost in cyberspace. The information has already been searched, collected, assessed and compiled. Easily accessible and at your fingertips, this directory can help you to get biographical information about authors and illustrators and to learn how they get ideas for stories, how illustrations are created, how to extend the books into the curriculum and where to find time-saving lesson plans and book-related activities for classroom projects and units. These outstanding websites of children's authors, illustrators and storybook characters were selected based on their educational value and for the fact that they contain a minimum of commercialization. They are exemplary examples of authors, publishers and scholars who understand and acknowledge the roles of teachers and librarians. Like little gems in cyberspace, they go beyond the ordinary content for busy educators.

*Nature-Based Learning for Young Children* Julie Powers, Sheila Williams Ridge, 2018-12-11. *Nature Based Learning for Every Preschool Setting* is designed to provide ideas for all early childhood educators ranging from novice nature educators to highly experienced nature educators in a wide range of ecosystems including forests, cities, prairies, coastal and deserts. It includes background information on a range of nature topics, reproducible parent newsletters, sample play-based lesson plans, guidance and health and safety issues related to nature activities, ideas for free/inexpensive equipment and materials and for big ticket items, ideas for family involvement and connections to early childhood learning standards. Chapters are divided by nature topic so readers can dip in right away where they want to start exploring.

course of instruction by correspondence which has been followed by more than 900 pupils This series of lessons to which a section on Medical Radiesthesia has been added forms the substance of this book Readers will see that Madame Maury who previous to becoming a nurse had studied physics in Vienna is a firm believer in the purely physical origin of the radiesthetic phenomena and some may think that her claims in this respect cannot always be justified For instance it is difficult to see how location on maps and diagrams which is now a well established fact can be attributed to anything but some obscure stimulus from the sub conscious mind Madame Maury very rightly stresses the individual nature of the radiesthetic art and anyone who has studied the subject from an objective point of view for many years will fully bear her out However that may be it is always an advantage for a novice to start on a definite system though he may find later that he has to depart from it and develop a method better suited to his own personality A book such as this which deals with Radiesthesia in its widest application and does not advocate unnecessary refinements in instruments and technique should be of great value as an introduction to a science which is still in a state of evolution      **Oregon Teachers' Monthly** ,1913      **Learn and Play Out**
