Freeberg,Amanda R. Ridley,Patrizia d'Ettorre,2022-08-31 The Routledge International Handbook of Comparative Psychology is an international reference work that offers scientists and students a balanced overview of current research in the field of comparative psychology and animal behavior The book takes an integrative approach to animal behavior with most of the chapters discussing research involving both proximate developmental and mechanistic and ultimate functional and phylogenetic levels of analysis Chapters cover the major ideas of core topics in the field and examine emerging research trends to provide readers deeper understanding of these ideas One of the strengths of this book is its the coverage of core topics in comparative psychology and animal behavior from different and diverse perspectives The diverse perspectives come from the wide range of focal species studied by chapter authors a range traditionally quite atypical for comparative psychology and from the widespread international

Nature's Oracle Ullica Segerstrale, 2013-02-28 W D Hamilton 1936 2000 was responsible for a revolution in thinking about evolutionary biology a revolution that changed our understanding of life itself He played a central role in the realization that what matters in evolution is not the survival of the individual but of the survival of its genes This provided the solution to the long standing problem of animal altruism that vexed even Darwin himself and in due course resulted in terms like selfish genes kin selection and sociobiology becoming familiar to a wider public Hamilton went on to solve many more major problems and open up ever new fields he shaped much of our current understanding of central problems including the evolution of sexual reproduction and ageing He became world famous and garnered international prizes But this is all in hindsight In fact Hamilton's recognition came late his career is a classic case of misunderstood genius In this illuminating and moving biography Ullica Segerstrale documents Hamilton's extraordinary life and work revealing a man of immense intellectual curiosity an uncompromising truth seeker a naturalist and jungle explorer a risk taker an unconventional scientist with a poet's soul and a deep concern for life on earth and mankind's future
