LCD Backlights Shunsuke Kobayashi, Shigeo Mikoshiba, Sungkyoo Lim, 2009-04-15 Research and development on liquid crystal display LCD backlight technologies are becoming increasingly important due to the fast growth of the LCD business. Backlight technologies contribute to functional improvements of LCDs in terms of wide colour reproduction, uniformity, improvements of luminance and colour temperature, high luminance, long life, less power consumption, thinner backlight unit, as well as cost. As LCD panel technology progresses, the lighting technology that provides the illumination for the panel must similarly evolve. *LCD Backlights* is written by a global panel of leading researchers and practitioners in this field from both academia and industry. The first part of *LCD Backlights* details the variety of applications of backlights including those in LCD TV, PC monitors and mobile devices. The second part is a full examination of the different light sources that are used, including the latest technological trends in amongst others cold cathode fluorescent lamps (CCFLs), mercury free fluorescent lamps and light emitting diodes (LEDs). The final part of the book analyses the optical component of backlights such as diffusers and brightness enhancement films. Key features: Provides a comprehensive analysis of the latest status of LCD backlight research and development. Discusses the design considerations and technical requirements for the multiple applications of LCD backlights. Considers techniques used for power saving and picture quality improvement. Examines the requirements for backlight units used for TVs, PC monitors and mobile phones. *LCD Backlights* is of significant interest to practising electronics and display engineers as well as scientists working on the development of liquid crystal displays. This book is also of value to graduate students and researchers involved in display technologies. The Society for Information Display (SID) is an international society which has the aim of encouraging the development of all aspects of the field of information display. Complementary to the aims of the society, the Wiley SID series is intended to explain the latest developments in information display technology at a professional level. The broad scope of the series addresses all facets of information displays from technical aspects through systems and prototypes to standards and ergonomics. **FCC Record** United States.
