*This space-egg houses all necessary items one could possibly need, bathroom, kitchen, lighting, a bed and several niches to store the stuff. The nose can be opened automatically and functions as a kind of porch.*

## BLOBV83

The design started with the idea of a floating pod, an extension to the house, one with heavy, especially hand-building requirements.

With the setting with limitations and knowing these boundaries at the same time, I took pleasure in designing a mobile unit, a blob.

An a mobile construction and making a high level of self contained house for small building codes.

BLOB, as a mobile, worked on levels as the project, resulting in the small building code.

Basically building a three foot round up with a floating material and painted with polyurethane. Shaped by hand using polystyrene and foam again, ready, the space was built up with niches, typically 40cm. The door is between the water to make that was filled up with 40cm insulation.

The space-egg houses all necessary items one could possibly need: bathroom, kitchen, lighting, stove and several niches to store the stuff. The nose can be opened automatically and functions as a kind of porch.

This mobile can naturally use as an office, a greenhouse, a workshop, a garden house, or any other space. The mobile unit is portable, easy to use for a big animal and human house is any place is needed.
