animals hear and understand music What does music do to your brain Why do people listen to sad music Why do some people
like classical but others only like heavy metal Is there some essential feature to all music You Are What You Hear is an
erudite and entertaining study that is unique in many ways No other book has thoroughly elaborated the connection between
music and social territory in humans although in other music making species scientists have shown this connection to be
clear cut Given the wealth of scientific evidence and historical narratives presented in You Are What You Hear an intellectual
investigation of this avenue is long overdue Written by a psychobiologist the work straddles hard science and psychology
