**Overcoming the Odds** Jennie E. Brand, 2023-08-31 Each year millions of high school students consider whether to continue their schooling and attend and complete college Despite evidence showing that a college degree yields far reaching benefits critics of higher education increasingly argue that college does not pay off and some students namely disadvantaged prospective college goers would be better served by forgoing higher education But debates about the value of college often fail to carefully consider what is required to speak knowledgeably about the benefits what a person's life might look like had they not completed college or their college counterfactual In *Overcoming the Odds* sociologist Jennie E Brand reveals the benefits of completing college by comparing life outcomes of college graduates with their college counterfactuals Drawing on two cohorts of nationally representative data from the Bureau of Labor Statistics National Longitudinal Surveys program Brand uses matching and machine learning methods to estimate the effects of college completion across students with varying likelihoods of completing four year degrees To illustrate her findings Brand describes outcomes using matched vignettes of college and non college graduates Brand shows that four year college completion enables graduates to increase wages and household income while also circumventing unemployment low wage work job instability poverty and social assistance Completing college also increases civic engagement Most of these benefits are larger for disadvantaged than for more advantaged students rendering arguments that college has limited benefits for unlikely graduates as flawed Brand concludes that greater long term earnings and less job instability and unemployment and thus more tax revenue less reliance on public assistance and high levels of volunteering indicate that public investment in higher education for students from

disadvantaged backgrounds yields far reaching collective benefits She asserts that it is better for our society when more people complete college Overcoming the Odds is an innovative and enlightening exploration of how college can transform lives

**From the Ground Up** Alison Sant, 2022-01-11 For decades American cities have

experimented with ways to remake themselves in response to climate change. These efforts often driven by grassroots activism offer valuable lessons for transforming the places we live. In *From the Ground Up: Local Efforts to Create Resilient Cities*, design expert Alison Sant focuses on the unique ways in which US cities are working to mitigate and adapt to climate change while creating equitable and livable communities. She shows how from the ground up we are raising the bar to make cities places in which we don't just survive but where all people have the opportunity to thrive. The efforts discussed in the book demonstrate how urban experimentation and community based development are informing long term solutions. Sant shows how US cities are reclaiming their streets from cars, restoring watersheds, growing forests and adapting shorelines to improve people's lives while addressing our changing climate. The best examples of this work bring together the energy of community activists, the organization of advocacy groups, the power of city government and the reach of federal environmental policy. Sant presents 12 case studies drawn from research and over 90 interviews with people who are working in these communities to make a difference. For example, advocacy groups in Washington DC are expanding the urban tree canopy and offering job training in the growing sector of urban forestry. In New York, transit agencies are working to make streets safer for cyclists and pedestrians while shortening commutes. In San Francisco, community activists are creating shoreline parks while addressing historic environmental injustice. *From the Ground Up* is a call to action. When we make the places we live more climate resilient, we need to acknowledge and address the history of social and racial injustice. Advocates, non profit organizations, community based groups and government officials will find examples of how to build alliances to support and embolden this vision together. Together we can build cities that will be resilient to the challenges ahead.

Current students of philosophy or armchair philosophers: Want the answer to the Primordial Existential Question: Why is there something rather than nothing? While history has produced no shortage of attempted answers, clearly none is the answer. Now comes the unique perspective of acosmism to provide a complete and plausible answer. After a lifetime of reflection, acosmist Sherman O'Brien offers this analysis of the issues and a thoughtful

reasoned answer to philosophy's most vexing question. The a cosmic answer requires no faith whatsoever either in supernatural or unexplained causes; in fact it discourages it. Acosmism rejects both traditional religion and philosophically neglectful science. As a metaphysical system it is based on an epistemological insight with implications for immortality, determinism, ethics, and ultimate purpose. Reasoned wholly from the ground up, its conclusion is the very meaning of existence. The solution to the Omniscience Riddle becomes the key to understanding how the question is best stated and understood. This book represents one person's effort to make sense of what is true and what only seems to be so. Why is there something rather than nothing? What is your potential role in the entirety of experience? This foray into acosmism offers a path to the genuine understanding of both existence and reality. Note: the main text constitutes roughly two thirds of the total pages; the remainder being mostly endnotes.
