and trends The distinguished author adding to the series of major works that have made him a leading authority on IP law triumphantly reveals in great detail how society has constructed IP in association with textiles so as to accommodate it to the particular characteristics of fashion that emerged in the last century More than two hundred sources many of them for the first time available in English illustrated with fifty figures allow the reader to directly encounter those who have made and continue to make the IP of textiles and fashion The underlying reasons of such aspects as the following become brilliantly clear how fashion designers protect their creations against the spread of knock offs how fashion entrepreneurs appropriate prestige and reputation how an iconic design becomes a brand or acquires secondary meaning and how such inventions as the sewing machine and the cotton gin affected IP rights in textiles and fashion Each source is preceded by a note placing it in its social economic and legal context The sources are structured in two chapters business identifiers trade and certification marks geographical indications and appropriation of knowledge and creativity patents designs copyright and trade secrets so as to permit an easy understanding of the enchainment of important moments that have contributed to give IP for textiles and fashion its special configuration in particular the transition from textile law to fashion law With this book listening directly to the voices of those who have made and make IP academics students magistrates professionals and the legal community as a whole will have a clear and realistic sense of how the combination of the entrepreneurial spirit with the imperatives of human consumption has designed and continues designing the special scope and limits of IP as applied to textiles and fashion
